As more sites move to fully electric setups, Three Phase installations are becoming more common across residential, commercial, and industrial jobs.

Hager offers a reliable range of 3P 3M RCBOs in both 6kA and 10kA, with ‘C’ and ‘D’ curve options — giving you the flexibility to match the right protection to your application.

Our 3P RCBOs are suitable for use in various load and phase combinations. Please ensure to follow the wiring examples below.

Our 3P 3M RCBOs are compatible with our **performa range** for commercial projects and our **invicta range** for small to medium commercial installations and large homes.

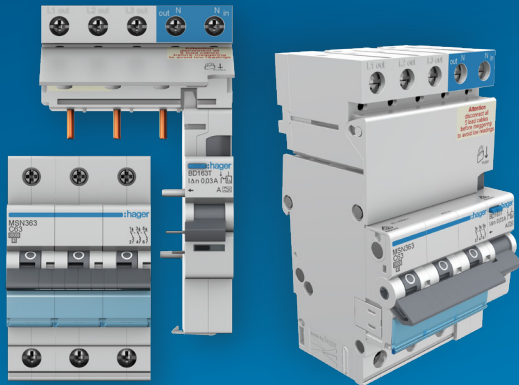

Want something a little more flexible?

We also offer the compact one module wide Add-On Block (AOB), which can be used in combination with any Hager 3P MCB up to 63A. This solution suits all Hager chassis boards including the performa range and invicta panelboards.

The AOB provides the characteristics of both devices, protecting the entire circuit of a panelboard and removes the need to wire between DIN mounted RCD & MCB.
