

Wireless home automation

With coviva, you can transform existing electrical installations into a smart home without any construction work or cable routing.

Simply combine coviva's micromodules with a smartbox and the coviva app to create a smart home that's easy to install, monitor and control.

coviva smartbox	17.2
Micromodules	17.3
Remote controls and transmitters	17.6
Wireless control solutions for renovation	17.8
KNX wireless system platform	17.10
sepio alarm system	17.16

TKP100A

coviva smartbox

Operating voltage:	5V=
Power consumption:	< 3 W
Transmission frequency:	868...870/433...434 MHz
Receiver category:	2
Transmitter duty cycle:	0.1...10%
Wireless range (open air):	300m
Network connection --> LAN:	at least Cat.5e-shielded
Network connection WLAN (optional):	802.11 b/g/n
USB port (only suitable for TKH180):	5 V=/250 mA in each case
Protection class, protection type:	II, IP30/IK04
Operating temperature :	0...40 °C
Storage temperature:	-25...70 °C
Relative humidity without condensation:	93% at 40°C
Dimensions (W x H x D):	178.5 x 156 x 48.4 mm

Delivery scope:

- coviva smartbox, adapter plate for optional wall mounting, RJ45 connection cable Cat.5e, power supply unit 230 V AC/5 V DC
- for visualising and controlling quicklink installations via an app.
- for Apple and Android smartphones
- coviva smartbox can only be commissioned with a myHager account as a registered electrician
- with 3 LEDs on the rear side (operation, WLAN and online) and one status RGB LED in the upper recess

Design

Cat. ref.

coviva smartbox

TKP100A

TKH180

USB stick for coviva

Operating voltage:	5V=
Current consumption:	max. 250 mA

- USB stick can be inserted to the side or rear of the coviva smartbox, depending on the installation
- WLAN connection of the coviva smartbox is only possible with the USB stick TKH180

Design

Cat. ref.

WIFI USB stick for coviva smartbox

TKH180

Robust and reliable, Hager's micromodules are compatible with all devices on the market. They enable lighting and powered opening/closing systems to be controlled remotely with the addition of wireless control points, so there will be no works or damage to your interior decoration.

Linked to coviva, they ensure remote and local control by smartphone or tablet. quicklink designates the set-up mode without any tools by using the buttons found on the products.

- Lighting functions
- On/Off (switch)
 - On
 - Off
 - On/Off (switch)
 - On/Off dimming
 - ON dimming '+'
 - OFF, dimming '-'
 - Timer
 - Scene setting

TRM693G:
This module is particularly appropriate for any type of lighting control, including CFL and LED.

- Rolling shutter functions
- Raise
 - Lower
 - Scene setting
 - Raise / lower (switch)
 - Force raise
 - Force lower
 - Repetition

Automatic recognition of the type of command (switch or push button) Paired On/Off switch inputs benefit from this function.

Repeater function
All products powered by mains are repeaters, boosting the signal.

Micromodule 2 battery inputs

- lithium battery powered CR 2430 3 V
 - LED powered
 - dimensions (H x L x D): 41 x 39.5 x 11 mm
 - 2 inputs for potential-free contacts
 - All types of command
- raise / lower
 - start / stop
 - scene setting
 - etc.

TRM694G

Micromodule multifunction

for controlling:
- garage doors, gates
- automatic pulse control
- door release
- SELV output
- dimensions (H × L × D): 40 × 40 × 20 mm

1 × 4 A potential-free output
2 inputs for potential-free contacts

Description

light grey

Cat. ref.

TRM694G

Simple configuration in 3 steps

01 Once the switch is connected to the emitter, start the configuration by pressing **cfg** button and then the button on the switch.

02 Select the function on the output (1 function = 1 color pattern). Validate by a long press > 2s until the LED blinks.

03 Exit configuration mode by a short press on **cfg** button on the emitter.

1 color pattern = 1 function

LED colour	On/Off Receivers	Dimmers	Shutters/Blinds
	Function	Function	Function
	on off On/Off (Toggle Switch)	On/Off Dimming +/-	Up/Stop (TRM692G only)
	on ON	+ ON (Dimming +)	Up, Stop
	off OFF	- OFF (Dimming -)	Down, Stop
	1 Scenario 1	1 Scenario 1	1 Scenario 1
	2 Scenario 2	2 Scenario 2	2 Scenario 2
	Timer	Timer	Down, Stop
	On/Off (Switch)	On/Off (Switch)	Shutter Control (Switch)
	on Priority ON		Priority UP
	off Priority OFF		Priority DOWN
	Clear	Clear	Clear

*functions only available on TRMxxx

Wireless transmitters enable control points to be easily added increased without any wiring or creating any mess. The TU444 remote control enables a tebis and/or wireless/mixed system to be controlled.

quicklink designates the configuration mode without any tools by using the buttons on the products.

Characteristics

- unidirectional transmitters in use and bidirectional in configuration
- frequency: 868.3 MHz wireless KNX
- low battery indication
- average battery lifetime: 5 years
- range: 100 m minimum in open field and through 2 concrete slabs

Take care with unused inputs; do not cut the wires and do not remove the insulation sleeves.

* according to the installation/assembly conditions

TRM600

Micromodule for remote controlled switches and timers

Enables a wireless control point to be added to an existing remote controlled or timer switch circuit.
- dimensions (H x L x D): 40 x 40 x 18 mm

Generates a pulse contact lasting 200 minutes
Connects behind a push-button in the existing circuit.

Description	Cat. ref.
white	TRM600

KNX wireless wall-transmitter 1 or 2 gang flat quicklink

For wireless remote control of all assigned KNX wireless receivers.

Operating voltage:	5V=
Power consumption:	< 3 W
Transmission frequency:	868...870/433...434 MHz
Receiver category:	2
Transmitter duty cycle:	0.1...10%
Wireless range (open air):	300m
Network connection --> LAN:	at least Cat.5e-shielded
Network connection WLAN (optional):	802.11 b/g/n
USB port (only suitable for TKH180):	5 V=/250 mA in each case
Protection class, protection type:	II, IP30/IK04
Operating temperature :	0...40 °C
Storage temperature:	-25...70 °C
Relative humidity without condensation:	93% at 40°C
Dimensions (W x H x D):	178.5 x 156 x 48.4 mm

KNX Functions available

- reset functions
- functions : Switching , Dimming , Blinds, 2 scenes, Time switching, NO contact push button
- integration in KNX wireless/TP gateway
- surface mounted
- ETS additional functions
- with led configuration
- with push button configuration
- toolless configuration
- delivered with battery 3V type CR 2430

KNX wireless wall-transmitter 1-gang flat quicklink

Characteristics

85655289

Operating voltage	3 V=
Battery service life	≈ 5 years
Wireless transmission frequency	868.3 MHz
Wireless protocol	KNX Wireless
Transmitter duty cycle	1 %
Receiver category	2
Number of wireless channels	2
Number of quicklink links	max. 20 transmitter/receiver
Wireless transmission power	< 10 mW
Wireless transmission range (free field)	max. 100 m
Wireless transmission range (building)	max. 30 m
Operating temperature	-5 ... +45 °C
Assembling height	14 mm

For wireless remote control of all assigned KNX wireless receivers.

- reset function (to factory setting)-
- quicklink functions: switching, dimming, blind, 2 scenes, time switching, NO contact push-button, memory
- integration in the KNX wireless/TP gateway, surface-mounted, into the KNX TP system
- ETS additional functions: +6 scenes, operating mode on/off, push-button, status display, dimming value
- with configuration LED
- with transmission status and battery status LED, red/green/orange
- with configuration button
- operating areas configurable as one or two-area operation
- with anti-dismantling protection
- with lithium coin cell battery 3 V type: CR 2430
- top and bottom operating area are freely configurable
- toolless quicklink configuration using buttons and LED display
- for flat surface mounting and extension of combinations

KNX wireless System Platform

Hager KNX wireless is a very versatile system. This is because its electronic platform masters both conventional applications and wireless solutions, in a very simple way. As it is a bidirectional wireless system, even existing KNX systems can be extended simply. Also, it is just as easy to install and assign functions and components via quicklink.

Common features

- 230 V, 50/60 Hz, +10/-15 % Low power consumption: < 0.1 W or < 0.3 W
- New PEIS AM/PM interface : better isolation and guiding SW and HW coding PM/AM recognition

- Claws (isolated) with larger opening Anti-theft-solution for all AMs (not for Berker R.x)
- Screw terminals with harder screws
- Uniform, high-value metal ring Mostly slim models (22 mm)

KNX wireless Dimmer

Replace the switch, insert the dimmer: Never before has it been this easy to combine increased lighting comfort with low energy consumption. As the first dimmer of its kind, the KNX wireless universal touch dimmer can control almost all dimmable light sources, from LED and energy-saving lamps through incandescent lamps through to halogen lighting, both reliably and without flickering.

Relay insert

230 V retrofit LED lamps	440W	- parallel compensated	1000W
Dimmable energy saving lamps	440W	- in Duo circuit	1000W

sepio control panel

- sepio wireless system is suitable for retrofitting of residential and small commercial premises.
- sepio is more than just an alarm. Thanks to its connection with your smartphones, it is even more user-friendly, interactive and effective. You can keep in contact with your home, and remotely visualise what is happening there at any moment of the day, or in case of any event detected.
- it features:
 - voice assistance with feedback for installation and use
 - progressive deterrence to dissuade intruders before break-in
 - several steps progressive deterrence with outdoor detector
 - control panel
 - compatible with then old LS range
 - extended connectivity PSTN/GSM/ADSL
 - multi-operator SIM card ensuring the best network availability
 - local and remote devices control

sepio alarm pack

- starter pack to secure housing

RLC304F

Wireless alarm control panel LS, 4 groups

Power supply	RXU05X power pack (4.5V / 14 Ah) RXU01X 200-240 V AC	- control panels manage: intrusion protection, protection of individuals, fire alarm and household protection
Battery life	5 years in normal conditions of use	- adapted for residential and small tertiary premises
Average current consumed	235µA	- can control up to 4 separate protection groups
Operating temperature	-10°C to 55°C	- speech synthesis (6 languages)
Degree of mechanical protection	IP30 / IK06	- 4 customizable command keys and 12 programming keys
Siren acoustic power	100 (±2) dB(A) at 1m	- status change signal light
Dimensions	232 x 232 x 67.7mm	- vocal personalisation of the detectors (max. 40)
Weight	1200g	- log of the last 500 dates and time-stamped events
Central siren with integrated command keypad allowing to parameter and use sepio alarm system.		- 4-step progressive deterrence, with outdoor detector and outdoor siren emitting strobe flashes
		- control can be operated from: remote, keypad with or without badge reader and with or without display, with or without voice synthesis, smartphone

seprio commands

Remote controls

- ensure wireless control of the alarm system functionalities, as well as lighting and shutters. They allow to locally or remotely send alerts through the system: alert, silent alert, fire alert, audible call.

Alarm pendant

- allow to send emergency call 24h a day, might the system be turned on or off. Waterproof, it can be used indoor or outdoor and works under the shower. It can be worn as a pendant, on a belt or fixed on the wall thanks to the cord and clip.

Keypads

- command keypad ensures the control of the alarm system functionalities and the management of code or badge access through Twinband® wireless.
- screen vocal keypad makes the installation easier and the use more convenient by confirming all control acknowledgment and signaling any potential anomaly or open door.

4 inputs wireless remote control

- 4 programmable keys wireless / hybrid alarm
- 4 programmable keys alarm / quicklink
- supply: 2 x batteries 3 V type CR2430 (included)

Command keypad

Power supply	4.5V / 2.7Ah battery pack
Battery life	3 years in normal conditions of use
Average current consumed	90µA
Operating temperature	-10°C to 55°C
Degree of mechanical protection	IP30
Dimensions	194 x 95 x 19mm
Weight	270g (with power pack)

Each command is confirmed with an audible signal and a visual signal (LED) issued by the keypad. The keypad also indicates the system status and any faults or open doors or windows.

- 4 personalisable keys
- code-based access to keypad commands
- alarm command functions
- 3-colour LED to support use and programming

RLF620X

The command and information keypad can be used to operate an intrusion protection system from inside the home.

Intrusion detection

Motion detectors

- ensure volumetric protection of the premises. They can detect any moving heat source, such as infrared radiation emitted by the human body. The "expert pet tolerant" feature allows to distinguish pets, and therefore enhance efficiency by avoiding any false alarm triggering. The bi-technology detector is particularly adapted to premises with high temperature variation. It combines 2 detection types (heat source and moving objects) to trigger intrusion alert.

Detector-camera with sending pictures

- ensure housing monitoring and, in case of break-in, trigger the alarm and capture, store or remotely transmit a sequence of images. It distinguishes the presence of human from pet and features an integrated flash light allowing to take pictures even in low lighting level.

Wireless motion detector

- 1 alimentation réf. BATLi38 fournie*

Description	Pack qty.	Cat. ref.
wireless motion detector, 90°, 12 m	1	S161-22F
wireless corridor detector, 22 m	1	S162-22X
wireless curtain detector, 12 m	1	S163-22X
wireless expert pet tolerant motion detector, 85°, 12 m	1	S165-22X

S161-22F

Pet-tolerant IR detector-camera with sending pictures

Power supply	lithium battery 4.5V / 3Ah	Fitted with a specific lens and able to record image sequences using its built-in camera, the PIR motion detector with image transmission detects intrusion in rooms at risk in the home and is able to distinguish between the presence of a human being and that of a pet (cat, dog).
Detection angle	90°	
Detection range	12m	
Operating temperature	0°C to +55°C	
Degree of mechanical protection	IP31	Following infrared detection, the motion detector triggers the alerts and deterrents and records a sequence of images. These can then be:
Dimensions	125 x 85 x 67mm	- Stored on the microSD card (supplied)
Weight	205g	- Remotely transmitted via a dialler/transmission module GSM/GPRS(MMS)

Outdoor anti-masking detector

Power supply	lithium battery 3.6V / 4Ah	- detects intrusion before break-in
Detection angle	180°	- anti-masking protection: detects any fraudulent masking of the front face 24/24
Detection range	5 setting levels from 2.5 to 12m	- 6 ready-to-use area mask sets supplied to adapt detection area
Operating temperature	-20°C to +60°C	
Degree of mechanical protection	IP55	
Dimensions	71 x 186 x 106mm	
Weight	540g	

RLA144X

Description	Pack qty.	Cat. ref.
outdoor anti-masking detector	1	RLA144X

IP55 detectors

- suitable for use in tough environment (garage, hangar, outdoor protection in pre-alarm mode, ...)

Outdoor detectors

- adapted for outdoor, even in tough environment, they are used for perimeter and premise protection from outside. Ideal to protect a door, a garage, a hangar or a facade. They feature the "expert pet tolerant" function and are adapted for an outdoor use.

Door and window detector

- ensures the protection of the doors and the windows of the premises. When any opening is detected, it triggers an alert.

S145-22X

Outdoor motion detector 2 x 12m

Power supply	lithium battery 3.6V / 4Ah	- for indoor / outdoor use
Detection range	12m	
Operating temperature	-20°C to +50°C	
Degree of mechanical protection	IP55	
Dimensions	56 x 128 x 235mm	
Weight	596g

sepio household protection

Detector for roller blinds

- detects the opening of a closed blind. When the blind is raised by a few centimeters, the detector triggers an alert.

Glassbreak detector

- specially adapted to bay windows protection in housings. it detects sounds vibration emitted by glass breaking and triggers an alert.

Technical detectors

- allows detection of different types of risks in housings or premises, such as:
 - prolonged power cut of a device or a housing
 - flood or critical water level in an installation
 - frost protection temperature threshold in a room
 - temperature threshold in a freezer to avoid device malfunction
 - smoke spillage due to an outbreak of fire

In case an incident is detected, the siren of the alarm system will emit audible beeps every 10 seconds during 3 minutes or until the conditions are back to normal.
A specific message is sent when the alert is remotely triggered.

S231-22X

Detector for roller blinds

Smoke and heat detectors

- trigger a specific sound modulation on the sirens, and an emergency lighting on the detector itself. It is possible to stop the detector tone by pressing the test button or any button of an infrared remote (TV, DVD reader, HiFi,...) without any prior programming.

- Smoke detector is complying to EN 14 604 : 2005 + AC 2008 certified
- NF492 par AFNOR Certification
- The technical detectors are permanently active, whatever the status of the control panel (activated or deactivated).

S155-22X

Smoke detector

Power supply	sealed lithium battery 2x3V	- for indoor application
Battery life	10 years	
Detection signal	85dB at 3m

Receivers

- allows to control a light in ON/OFF or time-delay mode, or an automatic gate or garage door in pulse mode. They can simulate a presence when associated with a keyboard. When associated with the control panel, allows to activate a light of a bright flash in case of an intrusion, but also indicates a report on the system status.

- depending on the status and events of the 2 systems, different life scenarios will be possible. The integration, in domovea, of the alarm functionalities is also possible, allowing to locally or remotely (from a PC, tablet or smartphone) act on the alarm system, or receive notifications in case of intrusion, anomaly or alert, for example.

Alarm interface

- is a bidirectional communication gateway allowing the link between tebis system (KNX and/or domovea) and wireless or mixt. The interface allows a perfect interaction between the 2 systems.

Wireless command receiver

- ensures the transmission of Twinband wireless messages between different system components while increasing their wireless operating range. It is also possible to equip wide areas where wireless transmission could be difficult.

External receiver

Operating temperature -20°C to +70°C - for indoor or outdoor application
 Degree of mechanical protection IP55
 Dimensions 150 x 85 x 35mm
 Weight 224g

Possible applications: on/off, time lag, presence simulation (when associated to keypad), remote control, impulse mode, system status reporting, activation in case of intrusion.

S781-22X

Description	Pack qty.	Cat. ref.
230V	1	S781-22X
12 - 24V	1	S791-22X

Alarm interface

Power supply 30V DC via KNX bus - for indoor application
 Operating temperature 0°C to +45°C
 Degree of mechanical protection IP30
 Dimensions 203 x 77 x 26.5mm
 Weight 140g

The TRC120 interface is used to enable Hager intrusion alarm system to communicate with the KNX world. On the alarm side, the interface communicates with the alarm central unit by wireless and by TP bus on the KNX side.

TRC120

Description	Pack qty.	Cat. ref.
white	1	TRC120

Relais sans fil

Power supply battery MPU01X - for indoor or outdoor (in sheltered location) application
 Operating temperature -25°C to +70°C
 Degree of mechanical protection IP54
 Dimensions 245 x 215 x 120mm
 Weight 880g

The receiver makes it possible to:

- interface a hardwired alarm product or any other low voltage automatic pulsed control device with the alarm system,
- operate additional deterrence devices (smoke generator, lighting, etc.) and other electrical devices (low voltage or power)

RLE700X

Description	Pack qty.	Cat. ref.
white	1	RLE700X

Transmitter

- The transmitter or plug-in module PSTN + GSM / GPRS allows, when an intruder or technical alarm is triggered, to remotely warn or alert by sending pre-recorded messages to several contacts, on their fixed-line or mobile phone.
- are a way to remove the doubt: listening and calling out (PSTN or GSM), transmission of the images captured by the detector through MMS (via GSM network with MMS option) to the private and films through ViewCom-IP to the monitoring station.

- They also allow to send by SMS via a system corresponding number informations about SMS consumption or SIM card validity, and by MMS the first 5 images captured by the detection alarm (via a detector-camera with sending pictures).

RLD464F

PSTN + GSM/GPRS stand-alone transmitter

Power supply	battery	Power supply:
Battery life	5 years in normal conditions of use	- (4.5 V, 14 Ah) RXU05X power pack - low voltage threshold standard Type C - low threshold 3.65 V
Average current consumed	235µA	- or (4.5 V, 14 Ah) RXU05X power pack backed up by (3.7 V 1.3 Ah) RXU03X Li-Ion buffer battery
Operating temperature	-10°C to +55°C	- or (200-240 VAC 50-60 Hz / 4.5 V DC 2.2 A) RXU01X internal mains power module backed up by (3.7 V/1.3 V) RXU03X Li-Ion buffer battery
Degree of mechanical protection	IP30	- Low voltage threshold Type A - 3.6V - recharge time 20 hours to 80% - Duration with back-up: 36 h.
Dimensions	216 x 237 x 67mm	
Weight	1070g	

The RLD464F dialler operates with the Hager Twinband® alarm system.

It is suitable for specific configurations when a plug-in module cannot be directly added to the control panel.

The RLD464F dialler is recommended for complete extended and redundant transmission in voice mode (analogical) via PSTN with GSM back-up.

Dimensions	165 x 63 x 35mm	
Weight	114g	

The RLD454F plug-in module operates with the Hager Twinband® alarm system.

It can be fitted to the control panel as an optional device.

The RLD454F module is recommended for complete extended and redundant transmission in voice mode (analogical) via PSTN with GSM back-up.

Description	Pack qty.	Cat. ref.
white	1	RLD454F

Sirens

- ensure alert function with modulations programmable from the control panel, for outdoor and indoor operation. A special modulation in case of fire is also available for alerts sent from fire or heat detector. Reinforced deterrence thanks to an outdoor detector which features audible, voice and light functions to dissuade intruder before break-in, or gradually reacts as the intruder approaches.

Indoor siren with vocal notification

Power supply	lithium battery 2 x (3.6V / 13Ah)
Battery life	5 years in normal conditions of use
Acoustic level	93 (± 2) dB
Operating temperature	-10°C to +55°C
Degree of mechanical protection	IP31
Dimensions	178 x 191 x 61mm
Weight	900g

The indoor siren provides audible information and ensures intruder deterrence when an alarm is triggered.

It sounds loudly in the event of intrusion, fire, audible warnings or household faults and issues vocal notifications about the system status.

It can be used as a door chime.

RLD414X

Description	Pack qty.	Cat. ref.
indoor siren with vocal notification	1	RLD414X

Outdoor siren with orange flash

Power supply	battery 6V / 14 Ah RXU06X	- for outdoor use
Battery life	5 years in normal conditions of use	
Acoustic level	103 (± 2) dB	
Operating temperature	-25°C to +70°C	
Degree of mechanical protection	IP54	
Dimensions	235 x 256 x 90mm	
Weight	2500g	

In addition to the protection provided by the control panel with built-in siren and keypad, the outdoor siren deters intruders.

In the event of intrusion, the siren is immediately triggered and sounds loudly for 90 seconds.

If a fire is detected, the siren is triggered in fire sounding mode for 5 min.

If somebody attempts to pull the siren off the wall, it sounds and then triggers all the alerts and deterrents via the control panel.

Thanks to its built-in transmitter, the siren notifies the control panel of battery faults, the radio link status and the tamper pin status.

Stand alone smoke detectors

- are dedicated to fire protection in housings. Equipped with optical technology, they are particularly adapted to detect slow growth fire.
- functions: fault indication when the detector head is dirty or not working, possibility to deactivate the detector for about 15 minutes, active 24 hours a day.

Stand alone heat detectors

- are complementary to smoke detectors, as they can be installed in rooms such as kitchen, where there can be cooking smoke. It detects when a temperature increases abnormally fast to reach 54 to 70°C.
- Functions: fault indication when the detector head is dirty or not working, possibility to deactivate the detector for about 15 minutes, active 24 hours a day.

Stand alone smoke detectors

Average coverage	50 m ²
Use	indoor
Power supply	TG600A: replaceable CR123A type 3 V lithium battery; 5-year battery life TG600AL: non-replaceable CR17335 type 3 V lithium battery
Operating temperature	- 10°C to + 65°C
Storage temperature	- 20°C to + 45°C
Degree of protection	IP30
Dimensions (D x H)	97 mm x 37 mm
Weight (with battery)	55 g

The optical smoke detector is designed to protect the private areas of apartment buildings, residential properties and mobile homes.

If smoke is detected, the detector's red LED flashes rapidly and modulated sounding is triggered (85 dB(A) at 3 m).

TG600A

Description	Pack qty.	Cat. ref.
smoke detector tester	1	TESTFUM

TESTFUM

It is possible to configure virtually any function in push-button mode – i.e. using the buttons on the devices themselves. Each transmitter is equipped with a configuration button (cfg) and each receiver is equipped with a configuration button and a function button (cfg + fct) for this purpose. All of the functions are indicated by coloured LEDs, whereby the fct button can be used to simply “scroll through” them.

1. Activating configuration mode

Briefly press the cfg button on the transmitter. The cfg LEDs on the transmitter and all receivers light up.

2. Configuring the transmitter

Briefly press the channel button to which a function is to be assigned on the transmitter. The cfg LED on the transmitter flashes for 1 second. Transmitter and receiver are now in configuration mode.

3. Selecting a function

Press the fct button on the receiver repeatedly until the chosen function is indicated by the fct LED.

4. Confirming the selected function

Press the fct button on the receiver and keep it pressed for > 2 s until the cfg LED starts flashing to confirm the selected function. To configure a group control system, repeat steps 3 and 4 on all other receivers in the group.

5. Terminating configuration

Briefly press the cfg button on the transmitter again. The cfg LEDs on the transmitter and all receivers go out. The configuration process really is “quick”!

LED colour	Switching outputs	Dimmers	Shutters/Blind outputs

Technical data	
Power supply	2xCR 2430 3.0 V (TBTS, SELV, ZLVS)
Estimated service life of the battery	5 years
Transmit frequency	868.3 MHz
Range in open spaces	100 m
Dimensions	76 mm x 49 mm x 23 mm
Cable length	< 3 m
Minimum dwell period	50 ms
Ingress protection rating – with wires connected	IP55 IP31
Operating temperature	-10 °C ... +50 °C
Storage temperature	-20 °C ... +70 °C
Standards	EN 60950-1 / EN 301489-3 EN 300220-2 / EN 50491-3

Contact assignments for external inputs

Installation

- ① The configuration button and LED **cfg** are located under the cover
- ② Transmission pilot light
- ③ Operator control buttons
- ④ Screw plugs for the battery compartment
- ⑤ Wall-mounting holes
- ⑥ Terminal strip holder
- ⑦ Terminal strip for external inputs

States indicated by the transmission pilot light ②

	State of the LED	Colour of the LED	Meaning
Activation of one of the buttons	Lights up briefly	Green	Transmitting the control command, input configured
	Flashes for 2 seconds	Green	Transmitting the control command, scene input (teach-in mode)
	Flashes for 1 second	Orange	Input not configured
	Flashes for 1 second	Red	Low battery charge
	Does not light up	-	- No batteries or very low charge - Batteries fitted the wrong way round

The device may be mounted to the wall with double-sided adhesive tape or screws. The following must be taken into consideration when using external inputs:

- Mounting orientation, i.e. horizontal or vertical alignment
- Supply line < 3 m

2 x 4 channel KNX remote control TU444

The TU444 remote allows to control sepio wireless alarm system and tebis quicklink^Q KNX output modules.

It features 4 command keys, each one allocated to one function of the sepio alarm system, and another in the tebis quicklink^Q system.

It can control up to 8 functionalities:

- 4 functions of the sepio wireless alarm system (orange LED)
- 4 functions of the tebis quicklink^Q system (green LED)

One or several buttons can also be configured to launch a scenario, therefore allowing by the press on one single button to control one sepio and one tebis quicklink^Q function at the same time (for example, press the scenario button will turn on the alarm and close the roller shutters.)

Use of the remote

The remote always emit the same kind of function (sepio wireless or tebis), the permanent system is the last or the only system in which the remote has been configured.

A short press (< 2 s) on one of the side push buttons (③) allows to exit the permanent system to temporarily access the other system.

The permanent system switch can be operated by pressing more than 2 s on one of the 2 side push buttons (③)

Key lock mode

In order to avoid accidental press, the user can lock (or unlock) his remote by pressing simultaneously the 2 side push buttons (③).

In locked mode, any press on the keys (②) are ignored and the LED (①) briefly light up in red. No command is emitted.

Factory reset

Press and hold the **cfg** button and release when the LED (①) blink (> 10 s). The LED (①) switches off when the factory reset has been completed. This operation causes the product configuration to be completely erased, whatever its configuration mode.

After a battery change or a factory reset, wait 15 s before proceeding to a configuration.

Product description

- ① 3-colour signal LED: red, orange, green
- ② Command keys
- ③ Side push buttons
- ④ Labels to indicate functions
- ⑤ Closing screw
- ⑥ Battery cover
- ⑦ Push button **cfg** / Reset
- ⑧ Warranty label

Note

TU444 is not compatible with S781-22X and S791-22X.

S161-22F 90°

Volumetric protection inside buildings,

- detection area : 12 m,
- horizontal coverage : 90°,
- vertical coverage : 50°,
- number of beams : 19

S162-22X corridor

Specific volumetric protection of narrow passages in
housings (entrance, staircase, corridor...).

- detection area : 22 m,
- horizontal coverage : 12°,
- vertical coverage : 55°,
- number of beams : 9

S163-22X curtain

Specific volumetric protection of indoor facades:
window bay, rooms with several doors or perimeter
protection, with or without occupants

- detection area : 12 m,
- horizontal coverage : 8°,
- vertical coverage : 55°,
- number of beams : 19

seprio intrusion detection

	RLA176X
Infrared detection	volumetric, 12 m, 85°
Optical field	12 m, 90°
Storage capacity	last 10 10-second sequences
Movie format for reading of the microSD stick on a computer (after intrusion or upon image capture request)	- VGA colour 640 x 480 - 10-second images sequences, 3 images/second
Images format for MMS	- JPEG colour 320 x 240 - 10-second images sequences
Movie format for remote monitoring	10-second movie, 1 image/second
Flash range	up to 7 m at 0 lux
Mounting type	bracket
Use	indoor
Supply	lithium battery BatLi30 - 4.5 V - 3 Ah
Battery life	5 years : 5 image capture (intrusion) per year + 10 sequences of images requests per month
LED Indicator lamp	1
Operating temperature	0°C to +55°C
Tamper protection	opening
Average humidity rate	from 5 % to 75 % without condensation at 25°C
Degrees of mechanical protection	IP 31/ IK 04

RLA176X pet-tolerant IR detector-camera with sending pictures

Detection area

for pets **under** 6 kg

for pets **over** 6 kg

- pet exclusion area
- area authorized to pet

Depending on the room and/or the pet, the mounting height (measured from the center of the detector lens) can be adjusted. When the detector isn't mounted at 2.2 m height from the floor, the limit between detection and non-detection area changes.

Infrared detection

allows rooms protection (living room, bedrooms,...) at a 90° angle for 12 m distance.

Optical field

Corresponds to the built-in camera's field of view at a 90° angle with a range up to 12 m.

NOTE: While capturing pictures in the dark, the range of the flash is limited to 7 m max.

Supply	
- battery pack (4.5 V - 14 Ah) RXU05X - Type C - Low voltage threshold 3.65 V - or battery pack (4.5 V - 14 Ah) RXU05X and secondary battery Li-Ion (3.7 V 1.3 Ah) RXU03X - or mains power supply module (200-240 VAC 50-60 Hz / 4.5 VDC 2.2 a) RXU01X backed up by battery Li-Ion (3.7 V 1.3 Ah) RXU03X - Low voltage threshold 3,6 V type A -Charging time 20 h at 80 % - 36 h operating life	●
Battery life	
5 years in normal conditions of use	●
Average current consumed	
235 µA	●
Average humidity rate	
from 5 %to 75 % without condensation at 25°C	●
Wireless link	
Wireless TwinBand® : 400/800 MHz	●
General data	
1 built-in programming keyboard	●
1 built-in microphone and 1 built-in speaker for recording and listening	●
2 access codes (installer, user) from 4 to 6 digits programmable	●
Speech synthesis in 6 languages	●
Automatically switch to summer/winter time	●
Max. number of images transmission detectors : 40 max	●
Welcome message personalisation	●
Voice messages to identify the products (with control panel S.I.T.E. card only)	●
Voice personalisation for 4 alarm groups	●
Log of the last 500 dates and time-stamped events	●
Remote control over the phone	PSTN/GSM ⁽¹⁾
Transmission protocols	
PSTN : voice protocol to individual correspondents / FSK 200 bauds and ID contact to remote monitoring companies	PSTN
- GSM : voice/SMS/MMS protocol to individual correspondents / contact ID to remote monitoring companies	- GSM
Transmissions	
- 3 call cycles of 2 or 3 phone numbers, up to 5 call attempts per number in case of no acknowledgement (20 digits max. per number) - 8 programmable phone numbers in case of alarm	●
1 phone number for system correspondent	●
Transmission of the alarm images to the remote monitoring company	●
Transmission up to 5 images JPEG via MMS to individual correspondents	●
Programmable call cycle (beginning and period of 1 minute to 31 days)	●
Digital transmission of switching on/off to a remote monitoring company (and to an individual correspondent via SMS if GSM)	●
Identification number from 1 to 8 digits for an individual correspondent call	PSTN/GSM
Identification number from 4 to 8 digits for a remote monitoring company call	PSTN/GSM-GPRS
Operating temperature	-10 to +55°C
Degrees of protection	IP30 and IK06
Tamper protection	
Against removal or opening	●
Against power cuts, depending on the used media	●
Against communication network cuts (PSTN, GSM interference), depending on the used media	●
Against wireless interference	●
Against fraudulent code search	●
Supervision	
Wireless	●
Battery / mains power module / secondary battery	●
Tamper protection	●

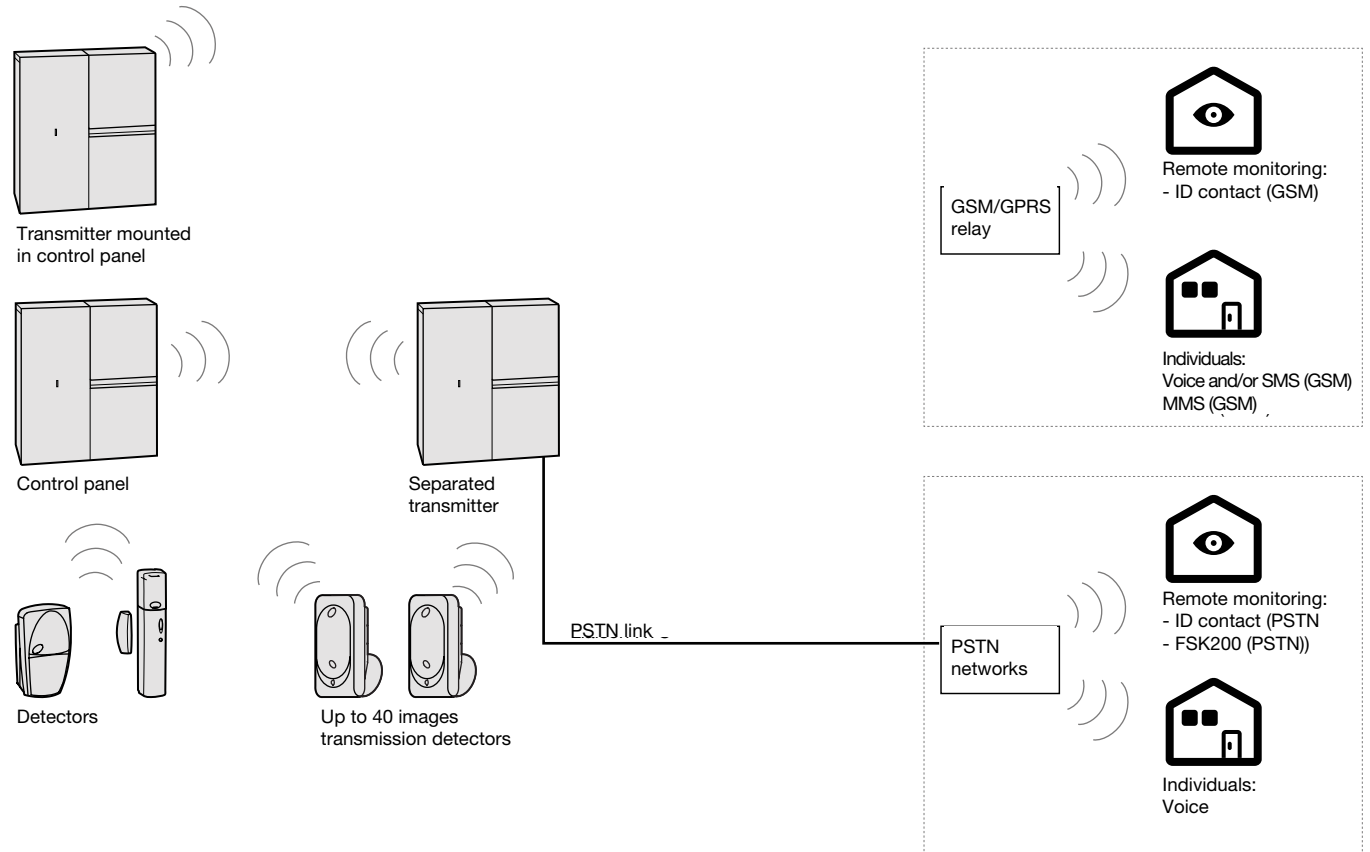

● : available function

⁽¹⁾ GSM, only if transmitter is supplied by mains.

sepio transmitters

The transmitter only operates in an alarm system including the control panel.
It communicates via several communication networks: PSTN - GSM/GPRS

The images transmission detectors convey:
- intrusion events directly to the control panel,
- the recorded images directly to the transmitter.

Note : Each images transmission detector must be linked to and identified by the control panel and the separated transmitter.

sepio sirens

	RLD414X	RLD415F / RLD416X
Acoustic level	93 (±2) dB at 1 m	103 (±2) dB at 1 m
Sounding duration	20 s to 180 s	20 s to 180 s
Modulation	3600 Hz to 4200 Hz modulation 6 Hz (internal sounding)	1400 Hz to 1600 Hz (external sounding)
Fire sounding	700/900 Hz, sounding duration : 5 mn	700/900 Hz, sounding duration : 5 mn
Transfer of Arm/Disarm indications	sounding and vocal message	audible
Environment	indoor	outdoor
Power supply	TwinPower® via lithium power pack (2 x 3.6 V) - C type - 3.1 V low voltage	power pack 4 x 1.5 V- C type - 5.01 V low voltage
Battery life	5 years in normal conditions of use	5 years in normal conditions of use
Average current consumed	223 µA	260 µA
Average humidity rate	5% to 75% without condensation at 25°C	5% to 75% without condensation at 25°C
Wireless links	TwinBand® 400/800 MHz	TwinBand® 400/800 MHz
Supervision	radio, power pack, tamper	radio, power pack, tamper
Operating temperature	- 10°C to + 55°C	- 25°C to + 70°C
