wiring accessories

Design for a better life 2023

:hager

Milestones of Hager wiring accessories

1919

Berker Brothers began to manufacture the first batch of rotary switches in Schalksmühle. Every detail was as simple, elegant, and functional as all Berker's other subsequent models.

1948

Traditionally, water-proof switches are made of cast resin or ceramics. Therefore, Berker's molded plastics rotary switch is a real innovation. The threads of the rotary switch are pressed into the top of the gland cover and grease cavity seals are installed on the axle. This type of switches features optimal waterproof performance. Its basic design features remained unchanged for decades of years.

1966

Although it seems quite natural today, dating back to 1966, the launch of a switch equipped with a dismantlable switch cover that can be backfilled after the completion of the painting engineering indicated a significant innovation and great progress in terms of convenience. Moreover, since the switch cover is easy to change, many of the 1966 rocker switches are still in good keep today and can still work normally.

1980

The combination of circle and square was one of our most successful products in the grim technical environment in the 1980s.

1996

'Twinpoint' design has interchangeable decorative rings, which provides all kinds of design possibilities

1928

Form + Function: When Bauhaus began to carry this concept forward, Berker Brothers have turned to the famous architect Louis Henri Sullivan's design concept. Functional and perfect design combined with reliable technology—Berker's switches already had all the elements that a product needs to become classic. These products later became classic indeed.

1957

The cover of this type of switch is as colorful as any of the modern works of art—That is why this colorful sample is called 'Chagall'.

1972

A big success, where modularization is used, the first type of stainless all-metal switch— Another real innovation.

1983

An expert to deal with difficult tasks: 'ISO-Panzer' has excellent waterproof and shockproof performances excellent waterproof and shockproof performances

1999

TS series can not only assist in creating special lighting effect, but can also combine KNX system for operating the complete smart home system.

2003

Full ranges included system 8000, 9000, 9088 metal ranges for Asia launched.

2008

The greatest feature of TS Crystal Ball is its glittering Swarovski crystal and sensitive optical reflection sensor, very charming.

2009

Touch of style as system 10088 equipped with large rocker and blue LED indication.

2016

Berker Q.7 not only highlights its form, functions, and craftsmanship, but also lifts architectural individuality and material application to a higher level.

2020

Hager Dream, Hager Inspire, Hager Muse with best-in-class aesthetics design, quality and full functions to answer all needs.

2004

Intelligence is a kind of beauty. Undoubtedly, B.IQ looks very beautiful: The first type of smart and fashionable home control unit in the world indicates the arrival of the new era of comfort.

2007

Only by touching... That is the artistic state to start to control a room. Technical progress makes it possible for us to combine minimalism with modern technology and create a new exchange mode.

2011

R.1 series explains its design of round angle of the excircle in its unique way. It has a soft framework outline and all kinds of functional versions. It is a good choice for all residential and decoration projects.

2013

stylea with slim and nice profile large rocker provided affordable option.

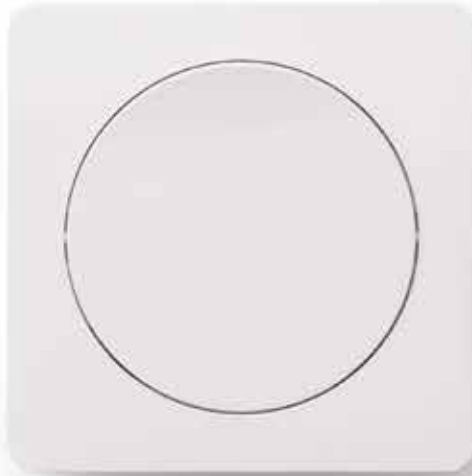

2018

Dream series, designed by the European designer, Erwin van Handenhoven, a winner of many international awards, bring elegant life experience to customers.

A top-down view of various white electronic components and red lipsticks on a black background. The components include several square PCBs with different layouts: one with a USB-C port and a 5V 2.1A label, another with a circular cutout, and others with various traces and components. Several red lipsticks in black tubes are scattered around the PCBs. The text "Inspire to aim high" is centered in white.

**Inspire to
aim high**

**Creative
round
design**

Exquisite design

With fine craft, designed precisely, only for the purpose of providing abundant wiring space and convenient installation means.

Delicate chamfering

Good design lies in every detail. Creative and delicate idea brings excellence to our living and working spaces.

Multicolor options

Many choices to fit your ideas: white, aurora silver, noble bronze, knight black, and elegant gold.

The unique brand

Individuality need not to be displayed but it is an expression of your character. The hager brand is exquisitely and uniquely located on the side, offering the product boundless space for expression and letting the essence of beauty blend with the quality of life.

Consistent in size

In accordance with the highest standard, the switch and socket are consistent in size, offering flexible interchange-ability.

13A 3 pin socket with USB charger

The socket is equipped with two 2.4A USB chargers, which intelligently adapt to mobile devices with different power consumptions, ensuring safety and fast charging.

Multi gang frame

Conjoined switch, socket and data combination, a delight on the wall, convenient and beautiful.

F
H
L

Customized panels

To meet design requirements, customers can enjoy exclusive customized service, making your switch panels unique.

Switch equipped with fluorescent indicator

The switch is dotted with rays of light like twinkling stars, waiting quietly for its guests to enter. Responding to your fingertip, it makes the home bright.

IP55 waterproof cover

Ensuring safety against water and dust ingress when operating in wet and dusty areas.

Quick installation

The mounting bracket has superior strength and rigidity. It is suitable for all kinds of installation conditions.

U type screwed terminals

Capacity of terminal can fit 3 x 4mm² flexible/ rigid cable. However, it is easy for wiring and faster for installation.

USB charger

4.2A, 5V charger with 1 Type C and 2 Type A port suits most portable electronic devices. No need for extra charger, with only USB cables. Up to 3 devices can be charged simultaneously. Easy and convenient to use.

16AX reliable and high performance

Mechanical switch

Rated current: 16AX

Rated Power: 4000W

The load capacity of switch is stronger, for better performance in increasing demanding installation.

Identification for power

Delayed power off is built-in, which save power in a smart way. The insert tag switch has LED indicator, which makes it easy for you to find the slot in the dark. After power on, the indicator will turn off automatically.

Hager exclusive

Color for every taste

Hager exclusive leads us to feel a better life. How to create a harmonious aesthetic feeling? The "60: 30: 10" golden rule is a visible must in our continual color-matching experiments, and our ultimate customized solutions would turn on your design concept.

We hardly wait to share you the following color-matching ideas of the year:

Elegant Charm

Exquisite, matt or modern or retro, the combination forms an aura of elegance and sophistication around you. You would just like to indulge yourself through every touch of the room.

Freshness and Harmony

It works so well with plants. You find peace in this natural aura and you finally have this moment to get refreshed. Every breath you take in this room your eyes are bright.

Smart Simple

Sparked by the Minimalist arts movement of the 1960s and 70s, and inspired by traditional Japanese design and Zen philosophy, minimalist express the smart simple concept of modernism in an almost puritanical palette. Colors, elements and motifs are kept to a bare minimum, with concealed storage and careful detailing playing their due part.

The Hager exclusive provides a creative setting in which those of us involved in planning can move around freely.

— Erwin van Handenhoven, Design Director of Hager Group

- Complies with IEC 60669-1 CB certificate

- 'AX' rated - No need to derate for fluorescent loads

- Supplied with M3.5 x 37 mm long fixing screws

- Capacity of each terminal:
3 x 1.5 mm²
2 X 2.5 mm²

- Two way switches can be wired either 1 way or 2 way

- Terminal markings denote:
L1 = one way
L2 = two way
C = common

- Material: Polycarbonate

Compliance with standards

Regulation 511-01-01 of BS 7671 : Requirements for Electrical Installations, IEE Wiring Regulations Sixteenth Edition is of particular importance to specifiers and installers with respect to product standards.

Regulation 511-01-01 requires every item of equipment to comply with the relevant requirements of the applicable British Standard, or Harmonised Standard appropriate to the intended use of the equipment.

British Standards (BS)

The BSI (British Standards Institution) was the first national standards body in the world. There are now more than 100 similar organisations which belong to the International Organisation for Standardisation (ISO) and the International Electrotechnical Commission (IEC).

British Standards are drawn up by all those who have a particular interest in the subject i.e. manufacturers, users, research organisations, government departments and consumers. This work is co-ordinated by BSI staff, acting as secretaries to the committees where the work is done. All standards are made available for public comment before they are published.

Harmonised standards

A Harmonised standard is a European standard formally presented by CENELEC, to the European Commission and published in the commission's official journal. CENELEC is the Comité Européen de Normalisation Electrotechnique i.e. European Committee for Electrotechnical Standardisation.

BS 7671 part 2 defines a harmonised standard as a standard which has been drawn up by common agreement between national standards bodies notified to the European Commission by all member states and published under national procedures. The UK national standards body is the British Standards Institution. In the UK a harmonised standard will normally be published as a British Standard European Norm i.e. BS EN.

British Standard European Norm (BS EN)

CENELEC European standards are pre-fixed EN (European Norm). Adoption of the European Standard within the EC is mandatory and member countries of CENELEC are obliged to publish them unchanged. In the UK such standards are further endorsed with the additional prefix 'BS', for example BS EN 60669-1 : 1996 is the British Standard European Norm for Switches for household and similar fixed electrical installations.

Whilst a European Standard can be a direct replica of an IEC standard, discussions within CENELEC may result in the formulation of a standard which includes commonly agreed variations and Special National Conditions.

International Electrotechnical Commission (IEC)

Founded in 1906 the International Electrotechnical Commission (IEC) is the world organisation that prepares and publishes international standards for all electrical, electronic and related technologies. The membership consists of 60 participating countries, including all the world's major trading nations and a growing number of industrialising countries.

Foreign national standards based on IEC standards are permitted to be used by BS 7671. However the specifier must verify that any differences between the foreign standard and the corresponding British Standard or Harmonised Standard does not result in any lesser degree of safety than that afforded by compliance with the British Standard. This assessment would probably need to be made by specialists.

Conclusion

BS 7671 (IEE Wiring Regulations) recognises equipment which complies with a British Standard or Harmonised Standard appropriate to the intended use of the equipment without the need for further qualification.

Hager products have always been designed and manufactured to a high standard to ensure compliance with the current British or Harmonised Standard. See the table below for further information.

| Product description | BS / IEC number | Description |
|-------------------------------------|--|--|
| Switches | BS EN 60669-1 IEC 60669-1 CB certificate | Switches for household and similar fixed electrical installations |
| Indicators | BS 5733 | General requirements for Electrical Accessories |
| Fused connection unit, cord outlets | BS 5733 | Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS) |
| Dimmers | BS EN 60669-2-3 | Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS) |
| Frames and plates | BS 5733 | Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS) |
| 10 /16 Amp Wall switch- | BS EN 60669-1 IEC 60669-1 CB certificate | Switches for household and similar fixed electrical installations |
| Dimmer switches | BS EN 60669-2-1 IEC 60669-2-1 | Electronic variable control switches (dimmer switches) for tungsten filament lighting |
| 13 Amp Socket Outlets | BS 1363- 2 SS145-2 | 13A plugs, socket-outlets, adaptors and connection units |
| 15 Amp Switched Socket | BS 546 SS472 MS1577 | Specification. Two-pole and earthing-pin plugs, socket-outlets and socket-outlet adaptors |
| 20 Amp D.P. Switches | BS EN 60669-1 IEC 60669-1 CB certificate | Switches for household and similar fixed electrical installations |
| 13 Amp Fused Connection Unit | BS 1363-4 | Specification for 13A fused connection units switched and unswitched |
| 45 Amp D.P. Switches | BS EN 60669-1 IEC 60669-1 CB certificate | Switches for household and similar fixed electrical installations |
| 45 Amp Cooker Control Unit | BS 4177 | Cooker control units |
| Shaver Socket Outlet | BS EN 61558-2-5 IEC 61558-2-5 | General Requirements Isolating transformers and safety isolating transformers Electromagnetic compatibility, immunity requirements for household CB certificate appliances tools and similar apparatus. |
| 25 Amp/ Amp Flex Outlet Plate | BS 5733 | General Requirements for Electrical Accessories |
| BS Batten | BS EN 61184 IEC 61184 BS EN 60238 IEC 60238 | Home office shield are T2 rated |
| Ceiling rose | BS 67 | |

Objective of CE marking.

CE marking is a “technical passport” which indicates that a product conforms to all relevant directives which require CE marking, thus enabling the product to travel within the E.U.

A directive is a piece of mandatory European Legislation implemented by regulations in all member countries. Its purpose is to allow free movement of goods that are safe and fit for use into and within the European Union.

CE marking is not a quality mark and it does not indicate that any testing or certification has been carried out.

The marking.

CE marking is a statement by the manufacturer that the product complies with the essential requirements of all relevant Directives, notably in the area of technical safety and conformity assessment.

CE marking can appear on the product or packaging or documentation or combination thereof dependant upon which directive it has to comply with.

CE marking is a very specific graphical symbol and must be clearly separated from other marks.

**Directives.**

It is the responsibility of the manufacturer or his authorised representative who places the product onto the EC market to decide which Directive(s) apply and to ensure the CE marking is affixed by the dates stated in the relevant directive(s)

For the majority of Hager products only one directive is applicable this is referred to as the Low Voltage Directive. Where some products incorporate electronic devices the Low voltage Directive and the Electromagnetic Compatibility Directive are applicable.

The low voltage directive.

EC directives are requirements adopted by the European Council and published in the official journal of the European Communities and are addressed to the member states.

European Council Directive 73/23/EEC with an amendment 93/68/EEC is known as the Low Voltage Directive.

The low voltage directive has been implemented into UK law by the “Electrical Equipment (Safety) Regulations 1994” and apply to all electrical / electronic equipment operating at a voltage of 50-1000 V a.c. or 75-1500 V d.c.. They do not apply to plugs, socket outlets and adapters which are covered by the Plugs and Sockets (Safety) Regulations 1994.

Relationship between the Electrical Equipment (Safety)**Regulations, Harmonised standards and the IEE Wiring****Regulations Sixteenth Edition.**

The Electrical Equipment (Safety) Regulations requires electrical equipment to be safe. Electrical equipment which satisfies the safety provisions of Harmonised standards shall be taken to comply with this requirement, unless there are reasonable grounds for suspecting that the equipment does not so comply.

Regulation 511-01-01 of BS 7671 Requirements for Electrical Installations, IEE Wiring Regulations Sixteenth Edition requires every item of equipment to comply with the relevant requirements of the applicable British Standard, or Harmonised Standard appropriate to the intended use of the equipment.

The Ingress Protection (IP) for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 605 29 - IEC 529 it comprises the letters IP followed by two character numerals:

The first character numeral indicated the degree of protection provided by the enclosure with respect to persons, also to the equipment inside the enclosure.

The first character numeral:
protection against solid substances

| IP | Description |
|----|--|
| 0 | Non-protected |
| 1 |  Protected against solid objects greater than 50mm |
| 2 |  Protected against solid objects greater than 12.5mm |
| 3 |  Protected against solid objects greater than 2.5mm |
| 4 |  Protected against solid objects greater than 1.0mm |
| 5 |  Dust-protected |
| 6 |  Dust-tight |

The second character numeral indicated the degree of protection provided by the enclosure with respect to harmful ingress of water; a third character may be used to indicate mechanical strength. An x signifies that no test has been carried out.

The second character numeral:
protection against liquid substances

| IP | Description |
|----|---|
| 0 | Non-protected |
| 1 |  Protected against dripping water |
| 2 |  Protected against dripping water when tilted up to 15° |
| 3 |  Protected against spraying water |
| 4 |  Protected against splashing water |
| 5 |  Protected against water jets |
| 6 |  Protected against heavy seas |
| 7 |  Protected against the effect of immersion |
| 8 |  Protected against submersion |

Additional letter (in option)

Protection of people against access to dangerous parts

| | Description |
|---|--|
| A | Protected against access of the back of the hand |
| B | Protected against access of a finger |
| C | Protected against access of a tool - ø 2.5mm |
| D | Protected against access of a tool - ø 1mm |

Additional letter (in option)

Success cases

The courage to try to innovate in architectural design; the design of excellence always brings together a lot of ideas; the pursuit of the ultimate detail and the admiration of superior quality. Today, whether in Munich, Berlin and Hamburg, or in Bolzano, Madrid and Seoul, these ideas can be traced in any building in the world. It is no coincidence that Hager switches and systems can be found in all of these places.

Hager Design turns technical products into familiar friends.

International designer Erwin van Handenhoven has been working with Hager since 2000 and his designs have repeatedly won international design awards. Erwin became the Product Design Director of Hager Group in 2013, focusing on shaping the future of Hager products and brands, making Hager design an international vane.

Before we start designing a new product, we think about the people it is going to serve. Will it assist or entertain, observe or protect, save time or save energy? Ideally, whatever it does, users will feel it is a reliable "friend". We need to know how to connect with people on an emotional level, to ensure that in return they feel connected to our products.

Design links exquisite emotions to great usability and quality. How to illustrate this better than through this new Hager range? I designed it with special care to become a real trendsetter for good taste. We know that the Asian continent is constantly raising its design sensibility and quality expectations. It is exciting to create in this particular context where tradition and change operate together. This new design range will upgrade the standard of living in a clearly visible way. Hope you enjoy it as much as I do.

Erwin van Handenhoven
