# Building the electrical world of tomorrow together

**“Our commitment  
is to provide you  
with future-proof,  
reliable and ingenious  
products, solutions  
and services.”**

Sabine Busse  
Hager Group CEO

**Dear customers, partners and friends  
of Hager,**

It is with great enthusiasm that I address you as the new CEO, taking over from Daniel Hager, who is now Chairman of the group's Supervisory Board. I am delighted to embark on a new chapter of the company alongside you, our customers, partners, and friends, as well our dedicated team of employees.

The world is electrifying at fast speed, and it is a privilege to be with you as your business develops. Our commitment is to provide you with future-proof, reliable and ingenious products, solutions and services. In the pages of this catalogue, you will discover them. I hope you enjoy discovering them as much as we enjoyed designing them.

As part of our continuing commitment to support you, we produce, invest and innovate to follow our guiding principle “safe & simple”. Over the past four years, we have invested over 500 million euros in our factories, logistics centres and in research & development. These investments ensure a level of quality, operational efficiency and continuous innovation in line with your evolving needs.

This is also reflected in our data strategy. We understand its crucial role in improving our processes and optimising your customer experience. We are investing more than ever in technological solutions to fully harness the

potential of data and provide increasingly customer-tailored solutions.

And our customer-focus does not end there. We are an environmentally transparent and responsible company, we integrate sustainability into our business strategy and operations. We develop solutions that enable our customers to become more sustainable, together we contribute to a successful energy transition with both reduced energy consumption and CO<sub>2</sub> emissions. We believe in creating a cleaner, safer and more enjoyable world for current and future generations; our strategic choices reflect this commitment.

Together, let's continue to build on our strong relationship and advance innovation while honouring our commitment to sustainability.

Thank you for your continued trust.

A handwritten signature in black ink, appearing to read "S Busse".

Best regards,  
Sabine Busse. CEO. Hager Group

# Our vision

Hager Group's vision is to make life on our planet safer, cleaner and more enjoyable through ingenious, sustainable and reliable electrical infrastructure solutions, for all kinds of buildings.

## Our world today and tomorrow

We're constantly reimagining electricity in order to meet the world's rising energy demands with better performing and less consuming products and solutions. We're also moving at pace with technology as electricity usage becomes 'smarter' in homes and buildings and yet one thing endures in all this fast-moving change, we will always produce and supply for you safe and simple solutions and products. It's what we have been doing for over 65 years.

## Big enough to matter, small enough to care

As a global player, we play in every domain of the electrical infrastructure world; energy distribution, energy management, e-mobility, cable management, wiring accessories, connected and automated homes. We have you covered and our products and solutions are almost always customisable should you desire. We've built a reputation for high quality, scalable and dependable European-made products that are tested, trusted and ready for all types of buildings large and small, so you and your customers can rest assured your installations will endure over the long term.

## Generational approach

As a family-owned business that prides itself on being easy to work with, finding solutions in the spirit of collaboration, cooperation and co-creation is how we enjoy working on a daily basis, it's how we feel business is done best and how end results are best achieved together.

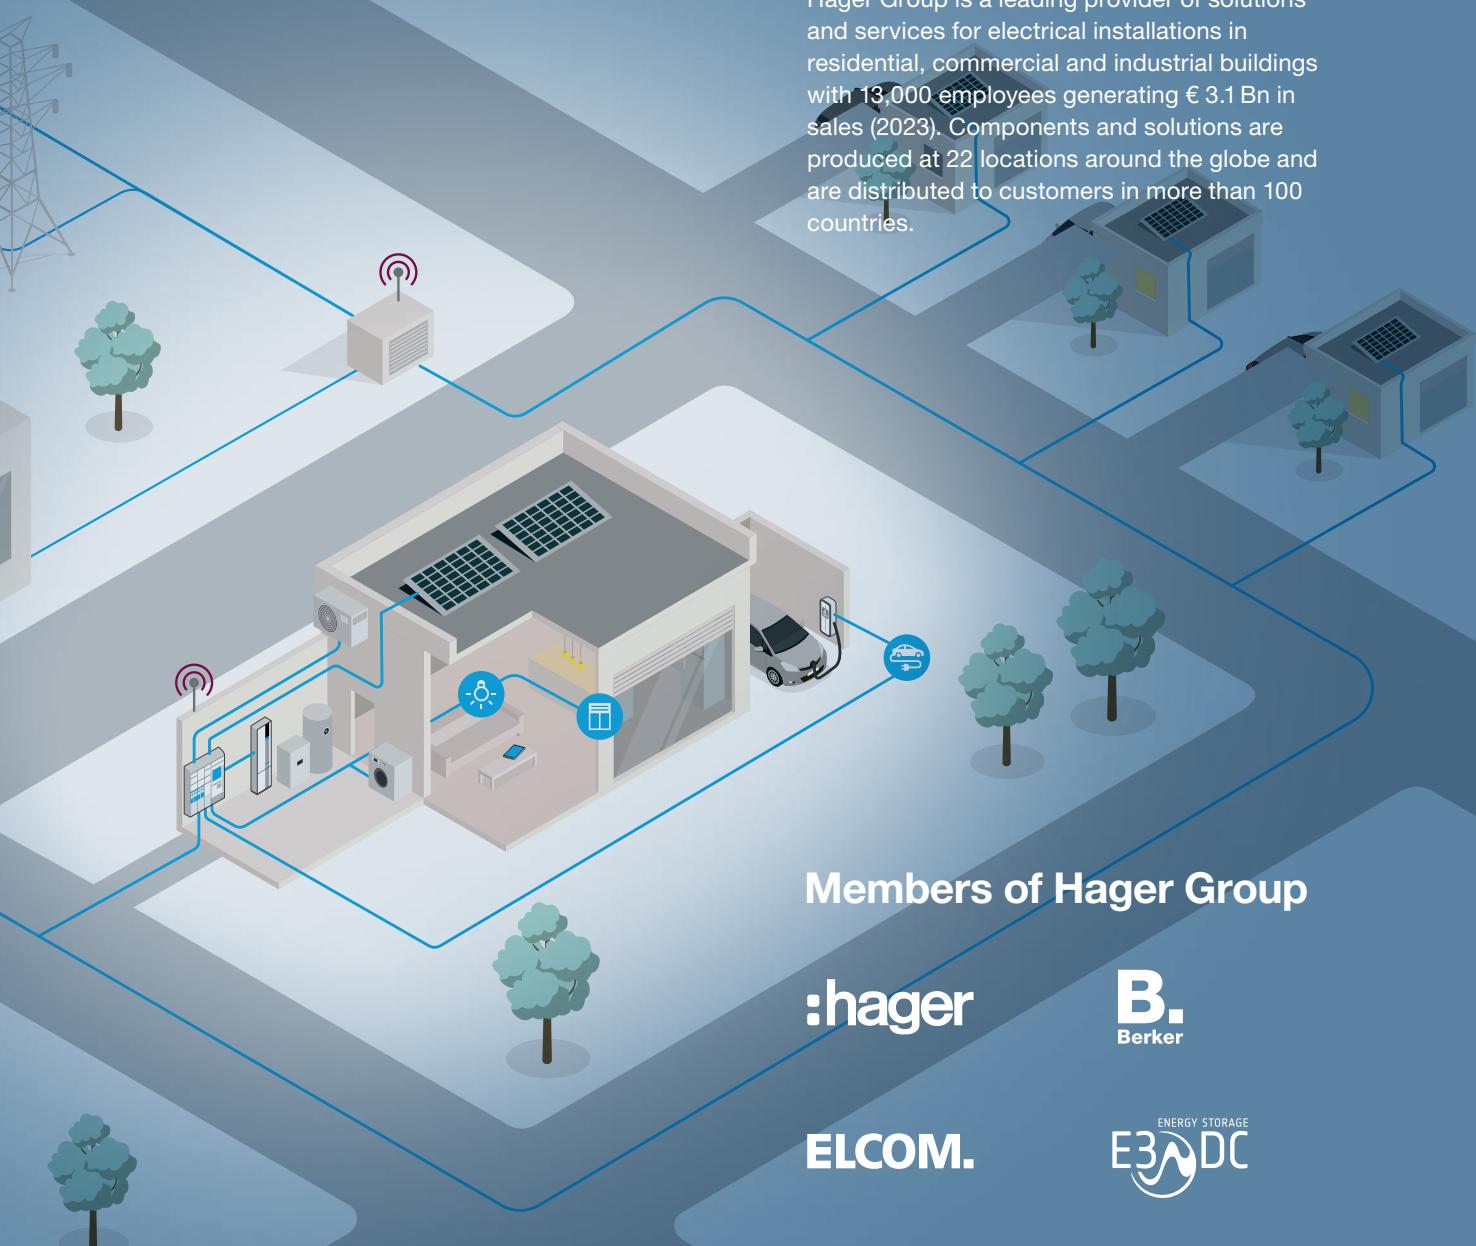

Because we're driven by an entrepreneurial flair in a world where people like you matter to us, so much so that we'll be by your side right through your projects and beyond. No matter what, Hager will go the extra mile for you to meet your requirements.

## Looking ahead

We are investing on a large scale to ensure you will always get the best from us with huge investments in production capacity and at distribution sites but also developing new and exciting products in our new research and development centres to meet the joint challenges of energy consumption and the environment. As much as the world changes we'll never change our approach to you, our customers, we'll always be with our customary support and learning platforms continuously available for you, with you.

# hagergroup

Hager Group is a leading provider of solutions and services for electrical installations in residential, commercial and industrial buildings with 13,000 employees generating € 3.1 Bn in sales (2023). Components and solutions are produced at 22 locations around the globe and are distributed to customers in more than 100 countries.

# On our journey to a sustainable future

At Hager Group, we shape the electric world of tomorrow, a world in which long-term success goes hand in hand with sustainability.

For us, sustainability encompasses Ethics, Employees and the Environment. We call our approach E3. This embraces an ethical approach to business, an inclusive and healthy work environment and reliable products and ingenious solutions which are future-proof. With a strong focus on the environment, we're on the way to making our company a low-carbon operation. We want to take our employees, partners and customers with us on this journey. Let's make better choices together. For our planet and for all generations.

## Ethics

We put a strong emphasis on a responsible approach towards business. This approach considers our own employees as well as every person involved in our value chain: from suppliers and their employees, to partners and customers. As we produce electrical equipment and solutions, consumer safety is one of our main concerns, as well as business and data integrity.

We are committed to complying with all national and international industry standards and in many instances go above and beyond what is required. Since 2007, we are signatories of the United Nations' Global Compact.

**E3** Ethics  
Employees  
Environment

# Employees

Recruiting and retaining talent is one of the great challenges of businesses today. For us, a sustainable business is only possible if we can attract the right people who feel welcome and able to fulfil their potential at Hager Group. We see our company as a cross-generational endeavour, much like a family. With life-long learning opportunities and opportunities to build a meaningful career we're offering our employees the ideal basis from which to fully engage in a long-term and fruitful mutual relationship with our company. It goes without saying that diversity and inclusion and equal opportunities are part and parcel of our recruitment policies.

# Environment

We are committed to reducing waste and emissions considerably by investing in an environmentally friendly design, the longevity and quality of our products and more sustainable solutions in production and distribution. We perform full life cycle analysis of all our products in the form of a Product Environmental Profile (PEP). At production level, we are continuously looking for ways to reduce our resources consumption. Currently, 18 of our production facility locations and 4 of our distribution centres are certified to the international environmental management standard ISO 14001, which defines globally recognised requirements for environmental management.

# Care-fully designed

We care for our customers.  
Our design tells the story.

High performance and premium solutions should incorporate great design. That is part of our mission at Hager, and we do take this to heart. The family of products you will find in this catalogue all fit together smoothly and therefore contribute to proud installations. This, in turn, contributes to loving the brand. We hope you love it as much as we do.

## **Let's see what that covers:**

We want to be best-in-class in usability. That means that our devices and systems should be easy to understand and easy to use in any situation. And why not aim for more than pure ease of use? In our new products, we aim for pleasurable, enjoyable features that will positively surprise you. Clever ideas that will make the difference for you and for end-users.

It is also about overall coherence. Our total family of devices should make sense to you. It should allow you to install habits and speed. It should contribute to building up familiarity and trust. Working with our solutions should feel like coming home.

Nice design is, of course, also about style, form precision, and finishings. We feel that Hager's

ingenious technical solutions deserve careful design to the smallest details. Attractive and recognizable design grants premium electrical installations that grace contemporary homes and buildings. We know how to fascinate your clients with contemporary yet timeless designs, but we also know how to elegantly disappear when needed.

Sustainability is part of our natural values and authentic attitudes. In a sense, eco-design is an expression of care. Care for the planet and, consequently, for all of us. We know we have an important role to play here. We always work to offer the best business solutions with a view to long-term sustainability.

## **Digital and physical design excellence:**

The rapidly growing digital world offers us endless

The Design Studio team

Erwin van Handenhoven, Hager Group Design Studio Director

possibilities. It has been anchored for many years now in our design philosophy.

We design our digital tools with the utmost care. Totally in line with the physical offer, they must reflect the same usability and identity. We want them to be easy to understand and fascinating and captivating to use. At the same time, they should enrich and simplify our user experience. We recently designed a new and thrilling digital design system that we will implement over time and that will be part of your future daily activities. As Hager designers, we want your digital experience to be friendly and cool but also classy and strong on performance, enabling the extraordinary tasks and workflows of the ever-evolving electrical world.

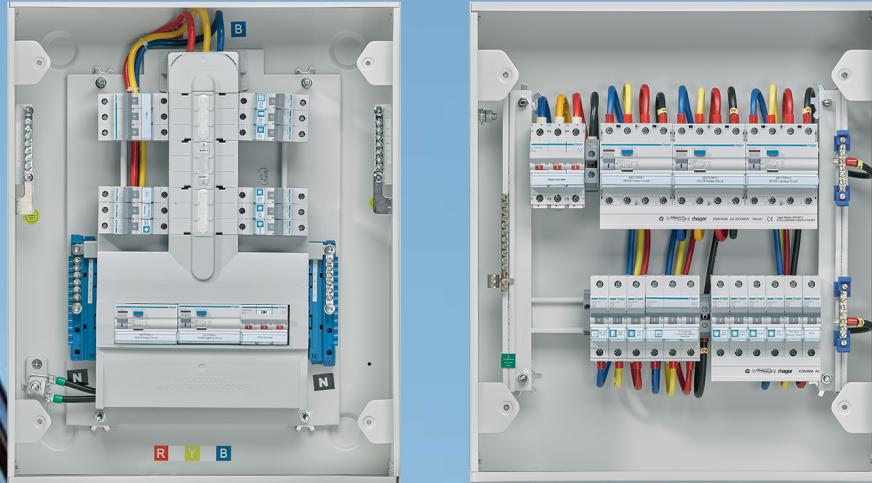

#### **Safe and simple:**

This new electrical world that we shape together with you must, above all, be perfectly safe for you and the end user. Protecting you in every possible situation. You need robust and reliable solutions. You claim premium quality devices, and we try to exceed your expectations. We design them with safety in mind but also in order for you to feel comfortable. Furthermore, they need to be safe for the planet, too.

Amidst the unstoppable rise of technical performance, we must not forget to aim for the simplest of solutions. Making things difficult is quite easy. Making high performance easy and simple for

you and your client is, on the other hand, a real challenge for our developers. This is clearly our focus and ambition.

We expect a careful and fully designed offer to be safe and simple. It is our everyday motto. We do not compromise here. We think about ingenious and innovative solutions based on the best technologies with only one purpose: satisfying our family of customers. You.

### Characteristics

The DIN rail boards are a safe and reliable solution for distributing and controlling power, compatible with various types of DIN rail modular components. The Invicta DR range is easy to install and available in flush and surface mounting enclosures, in 16 or 24 module width options. The range includes boxes with capacities ranging from 1 to 6 rows with 16 to 96 modules, as well as 4 to 6 rows with 96 to 144 modules.

### Characteristics

Invicta 125A Type B distribution board range is a perfect solution for both residential and commercial installations. The range includes 125A boards with multiple incomer choices, available in flush and surface mounting enclosures. The range offers a variety of options, including boxes with capacities ranging from 4 to 24 TP ways, available in both fixed and split load types.

**Complies with: IEC 61 439 – 1 & 3**

**ASTA certified & ADQCC approved**

### Delivered with

- 125A rated pan assembly
- height adjustable & removable busbar assembly
- neutral and earth brass terminal
- plain metallic door
- door earthing to ensure earth continuity
- removable pre punched top and bottom gland plates.
- I/C link kit suitable for 3 pole modular isolator (up to 125A) MCBs (up to 63A) or RCCBs (up to 125A)

### Technical data

- class I
- IP41
- colour : RAL 9002
- steel epoxy powder coated enclosure
- backbox and frame : 1.2mm, door 1.0mm
- 120mm depth
- busbar current rating: 125A
- rated voltage (Un /Ue): 415V ac - 50Hz
- rated insulation voltage (Ui): 690V ac
- rated impulse withstand voltage (Uiimp): 4kV
- rated short circuit withstand (Icw) : 17kA for 0.25 sec.
- suitable for modular incomers (125A) and modular outgoings (63A)
- incomer cutout width: 13 mod
- incomer DIN rail mounting
- reversible doors
- accessories like key lock, DIN rail extension boxes etc ...

**Characteristics**

- standards: IEC 61439 - 1 & 2
- suitable for non - modular (MCCBs & isolating switches) incomers and MCCB outgoings
- option for installing CTs in meterable versions
- ASTA certified
- busbar current rating: 250A
- rated short circuit withstand for busbars 25KA
- removable top and bottom gland plates
- steel with epoxy powder coating
- RAL 9002
- IP41
- accessories like key lock, DIN rail extension boxes etc ...
- Backbox and frame : 1.5mm, door 1.0mm

Description	Cat. ref.
keylock for distribution board	<b>JK1XKLS</b>

unimes.ME main distribution boards provide comprehensive range of solutions that caters to versatile project requirements.

The distribution boards are optimized for different configurations and requirements and have the ability to expand if required in the future.

unimes.ME complies with the most stringent safety criteria set by IEC standards to provide maximum safety of equipment and personnel.

unimes.ME switchboards are among the most compact in the market. They are pre-assembled in accordance with panel builder requirements to save on assembly time.

Internal metallic and non metallic partitions up to form 4b provide maximum

protection against direct contact with any live parts. The form 4b partition also limits contact with solid bodies (e.g. working tools)

With an IP54 rating, unimes.ME provides complete safety from foreign solid bodies or liquids.

Busbars are enclosed in fully partitioned compartments. They consist of one or more copper bars per phase held by functional busbar supports. The main busbars are mounted horizontally while the distribution busbars are mounted vertically to enable front and rear access to the busbars.

The ample space in the main busbar chamber provides easy and safe coupling between the different enclosures. This reduces the assembly time and also increases the safety of operation.

## Technical Characteristics

### Mechanical characteristics

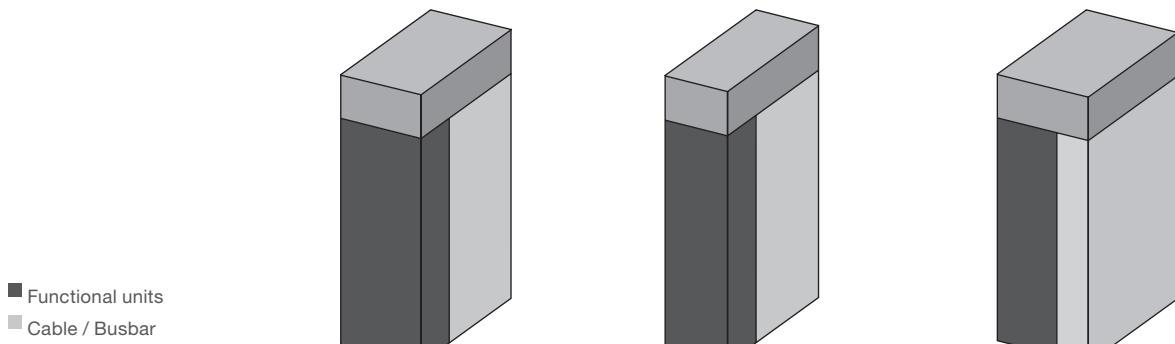

Degree of protection		
In accordance with IEC 60529		
<b>External</b>		
		IP54
<b>Forms of separation</b>		
as per IEC 61439-2		
<b>Dimensions</b>		
Height (mm)		2200 (with plinth)
Width (mm)		600, 800, 900 (600+300)
Depth (mm)		800
<b>Surface treatment</b>		
Internal Components		Powder coated / Painted
External Components		Powder coated /Painted
<b>Resistance to corrosion IEC 61439-1 / 10.2.2.2</b>		
Damp heat cycling test		IEC 60068-2-30
Salt mist test		IEC 60068-8-11
<b>Resistance of insulating materials IEC 61439-1 / 10.2.3.2</b>		
Glow wire test		IEC 60695-2-11

### Electrical characteristics

Standards		IEC 61439
<b>Voltage ratings</b>		Rated operational voltage ( $U_e$ ) 415 VAC
Rated insulation voltage ( $U$ )		1000 VAC
Rated impulse withstand voltage ( $U_{imp}$ )		8 KV
Rated frequency ( $f_r$ )		50 / 60 Hz
<b>Current ratings</b>		Rated current ( $I_{na}$ ) upto 2500 A
Rated peak withstand current ( $I_{pn}$ )		105 kA / 187 kA
Rated short-time withstand current ( $I_{cw}$ )		50 kA, 3 s & 85 kA, 1 s

# Flexibly scalable installations

This system is flexible and allows perfectly smooth integration in all types of projects, including multimedia or automation devices. Using a wide choice of functional accessories, you can easily associate multiple enclosures or add rows of modules to optimize space. vega D distribution boards guarantee installation without unnecessary effort and constraints. And to save even more time, partially equipped enclosures can also be ordered.

## Professional finishing

Clip-on label holder & above or below modular products for perfect alignment. Doors to choose from, solid or transparent. Timeless design and impeccable finish. Outside of the modular footprint.

## Smart packaging

Easy unpacking  
Storage of ingenious dismantled parts  
Reusable / Recyclable for a future shipment

## Easy cabling

More accessibility on the sides and more spaces between the back of the cabinet and the DIN rail. Fixing without tools.

### Characteristics

Vega D flush and surface mounting enclosures range is adapted to installations in residential and commercial premises. The vega D range includes enclosures from 2 up to 7 rows from 48 to 168 ■ capacities.

### Delivered with

- quickconnect earth terminal block
- blanking clip
- marking strip
- pocket plan
- cable strain relief bar

### Technical data

- IP30 and IK07 without door
- IP40 and IK08 with door (flush)
- IP41 and IK08 with door (surface)
- class II
- DIN rail mounting
- colour: RAL 9010
- material: metallic enclosure
- empty space for equipment unit for enclosure to be completed

**Note:** enclosures of this range are delivered without doors.

# Main circuit breakers

Our main circuit breakers allow the connection, protection, breaking and switching in the low voltage distribution boards.

The range includes air circuit breakers, moulded case circuit breakers and load break switches.

O = AC/DC 220V motor with RTC  
P = AC 380V motor with RTC  
Q = AC 440V motor with RTC  
R = DC 24V motor with RTC  
S = DC 48V motor with RTC  
U = without motor with RTC

### Shunt release

- A = without  
B = AC/DC 110V  
C = AC/DC 220V  
D = AC380V
- E = AC 440V  
F = DC 24V  
G = DC 48V

**Guaranteed protection**

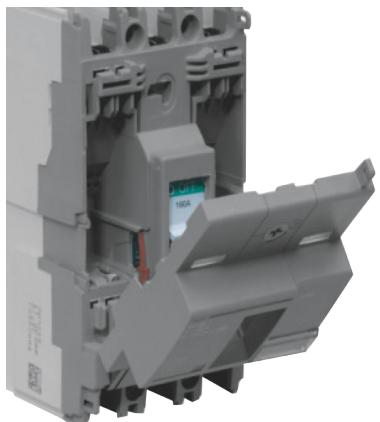

# h3 MCCB

## Moulded case circuit breaker

h3 range of MCCBs - the reliable solution for protecting low voltage distribution systems against overloads and short circuits.

With a compact size and available in 1,2,3,4 pole configurations, these state of the art circuit breakers offer installers and panel builders a wide range of features and benefits, including a breaking capacity ranging from 18kA to 70kA and options for built-in thermal-magnetic or electronic trip units, ensuring high protection performance.

## 01 Easy mounting of auxiliaries

Easy opening of secondary cover, clip-on type auxiliaries.

## 02 Visibility of auxiliaries fitted

Indicates type of auxiliary mounted in the circuit breaker.

## 03 Integrated padlocking facility

A very good solution for maintenance.

## 04 Complete range of accessories

Rotary handles, padlocks, motors, terminal covers, a wide range of terminals & connections.

## 05 Breaking capacity

18 to 70kA, Icu 415V AC, covers all applications.

**Characteristics**

- Thermal magnetic trip unit
- Two versions:
  - Z version: fixed thermal and fixed magnetic
  - U version: adjustable thermal and fixed magnetic
- Adjustable thermal: 0.63 - 0.8 - 1 x In
- Access to mechanical test button on cover
- Lockable cover protects MCCB settings
- Integrated padlocking handle: Ø 4mm
- Cage terminals

- Connection capacity: 95mm<sup>2</sup> rigid cables, 70mm<sup>2</sup> flexible cables
- Fixed thermal: 1x In

**Complies to the standard IEC 60 947-2**
**Trip-free switches :**

- Allows tripping at distance using a voltmetrical trip unit (optional)
- AC 22/23A
- Complies to the standard IEC 60 947-3

HNA161U

#### Trip-free switches x160

suitable for AC22A / AC 23A  
Ue: 415 V AC  
Icw (1s): 2 kA

Description	In (A)	Cat. ref. 3P	4P
trip-free switches x160	125	HCA125Z	HCA126Z
	160	HCA160Z	HCA161Z

HCA160Z

**Characteristics**

- Thermal magnetic trip unit
- Two versions:
  - Z version: fixed thermal and fixed magnetic
  - U version: adjustable thermal & magnetic
- Access to mechanical test button on cover
- Lockable cover protects MCCB settings
- Integrated padlocking handle: Ø 4mm
- Direct connection with palm lug max. width: 25mm
- Connection capacity: 185mm<sup>2</sup> rigid cables, 150mm<sup>2</sup> flexible cables
- Z version
  - Fixed thermal: 1x In
  - Fixed magnetic: ≥10 x In

## - U version

- Adjustable thermal: 0.63, 0.8, 1 x In
- Adjustable magnetic:
  - 6 - 8 - 10 - 13 x In (100 - 200A)
  - 5 - 7 - 9 - 11 x In (250A)

**Complies to the standard IEC 60 947-2**
**Trip-free switches :**

- Allows tripping at distance using a voltmetrical trip unit (optional)
- AC 22/23A
- Complies to the standard IEC 60 947-3

**MCCBs x250 25kA**

HHB100Z

Breaking capacity Icu: 25kA (400/415 V AC) Ics: 20kA

Description	In (A)	Cat. ref. 3P	4P
fixed thermal	100	HHB100Z	HHB101Z
1 x In	125	HHB125Z	HHB126Z

5 - 7 - 9 - 11 x In (250A)	250	HNB250U	HNB251U

HCB250Z

**Trip-free switches x250**

- suitable for AC 22A/23A
- Ue: 415VAC
- Icw (1s): 3 kA

Description	In (A)	Cat. ref. 3P	4P
trip-free switches x250	250	HCB250Z	HCB251Z

### Characteristics

- Adjustable thermal and magnetic trip unit
- 3P & 4P
- Mechanical test button

- Lockable settings
- Compliant with IEC60947-2.

### Connection:

- Directly on copper cable terminal with end lug
- Max. width: 32mm

### MCCB x630 25kA TM Fixed

### Characteristics

- Access to mechanical test button on cover
- Lockable cover protects MCCB settings
- Direct connection with palm lug max. width: 30 mm
- Connection capacity: 240mm<sup>2</sup> rigid cables,  
240mm<sup>2</sup> flexible cables
- Thermal magnetic trip unit TM:  
thermal adjustment: from 0.63 to 1 x In  
magnetic adjustment: from 6 to 12 x In
- Electronic trip unit LSI:  
long delay (thermal equivalent) adjustable: Ir = 0.4 to 1 x In  
short delay (magnetic equivalent) adjustable: 2.5 to 10 x Ir (400A)  
2.5 to 8 x Ir (630A)  
time delay: 0.1 – 0.2 s  
3P & 4P (adjustable neutral 0 - 50% - 100%)

**Complies to the standard IEC 60 947-2**

### Trip-free switches :

- Allows tripping at distance using a voltmeter trip unit (optional)
- AC 22/23A
- Complies to the standard IEC 60 947-3

HHD400U

HED401H

### MCCBs h630 70kA LSI\*

Breaking capacity Icu: 70 kA (400/415 V AC) Ics: 50 kA

Description	In (A)	Cat. ref. 3P	4P
adjustable thermal: Ir = 0.4 to 1 x In	400	<b>HED400H</b>	<b>HED401H</b>
adjustable magnetic: 2.5 to 10 x Ir (250-400A) 2.5 to 8 x Ir (630A) time delay: 0.1 - 0.2 s	630	<b>HED630H</b>	<b>HED631H</b>

### Trip-free switches\*

suitable for AC 22A / AC 23A  
Ue: 415 V AC Icw (0.3s) = 5kA

Description	In (A)	Cat. ref. 3P	4P
trip-free switches	400	<b>HCD400H</b>	<b>HCD401H</b>
	630	<b>HCD630H</b>	<b>HCD631H</b>

**Characteristics**

- Electronic trip unit LSI:

long delay (thermal equivalent) adjustable:

$I_r = 0.4 \text{ to } 1 \times I_n$

short delay (magnetic equivalent) adjustable:

2.5 to 10 x  $I_r$  (630-800A) and

2.5 to 8 x  $I_r$  (1000A)

time delay: 0.1-0.2 s

- 3P & 4P (adjustable neutral 0 - 50% - 100%)

- Mechanical test button, lockable settings
- Connection capacity : Directly on copper cable terminal, with end lug max. width: 50 mm

**Complies to the standard IEC 60 947-2**
**Trip-free switches :**

- Allows tripping at distance using a voltmetrical trip unit (optional)

- AC 22/23A

- Complies to the standard IEC 60 947-3

**MCCBs h1000 50kA LSI**

# h3+ MCCB

## Moulded case circuit breaker

The new generation of Hager Moulded Case Circuit Breakers h3+ ensures reliable protection against overloads and short circuits, combined with accurate integrated energy monitoring for all low voltage distribution systems. With a compact frame size, available from 25 to 630A in 3 and 4 poles, h3+ offers high protection performance with a breaking capacity up to 50kA.

h3+ MCCBs, available with either a built-in thermal-magnetic trip unit or electronic trip unit, offer flexible protection settings to ease discrimination in all electrical distribution installations.

Users will benefit from a class 1 energy monitoring and communication system compatible with Modbus RTU protocol, that will allow them to configure protections parameters, monitor energy consumptions and manage alarms.

Special attention has been given to ergonomics in order to facilitate the integration of h3+ MCCB in electrical panel boards. Different methods of mounting are proposed along with different types of connections to increase the flexibility of installation.

h3+ P160 3P Energy

h3+ P250 3P Energy

h3+ P630 3P Energy

### h3+ Moulded Case Circuit Breaker at a glance

The h3+ range of MCCB can be briefly described as follows:

- 3 frame sizes: P160 and P250, 3P630
- Rated current from 25A to 630A
- Icu up to 50kA, Ics up to 50kA (415 V~)
- Available in 3 and 4 poles
- Rated nominal voltage Ue up to 690 V~
- Thermal-Magnetic, Magnetic and Electronic Trip Units
- Wide range of accessories

### h3+ Switch-disconnectors

- P160 ratings: 125A, 160A
- P250 ratings: 200A, 250A
- P630 ratings: 400A, 630A

### Energy electronic trip unit with:

- Embedded display
- Measurement features (I, U, P, E, PF, THD...)
- Class 1 accuracy on energy measurements according to IEC 61557-12
- Alarm management and event histories
- Output contacts (PTA, OAC)
- Modbus RTU communication for remote monitoring and control
- Maintenance Interface Port (MIP)
- Communication accessories (Panel display, COM module...)

<b>Circuit breakers</b>	<b>P160</b>	<b>P250</b>	<b>P630</b>	
Number of poles	3, 4	3, 4	3, 4	
<b>General characteristics</b>

**Load break switches 20 to 125A**

- modular design,
- to mount directly on DIN rail,
- lockable in OFF position.

Comply with NF EN 60 947-3.

HAC410

#### Connection

- with collar terminals copper conductors compatible.
- connection capacity:

**HAB** 20 to 63A: 16 mm<sup>2</sup> flexible or rigid cables

**HAC** 60 to 100A: 35 mm<sup>2</sup> flexible or rigid cables

**HAD** 100 and 125A: 70 mm<sup>2</sup> flexible or rigid cables

#### Load break switches visual breaking

- disconnector modular design
- IP20
- In=Ith, AC23

### Load break switches with handle

- for main and/or modular breaking, to use in commercial premises.

- Ith (40°): 125 to 1600A

- Un 400 / 690V AC

- 3P and 4P switches with visible breaking, with sudden double breaking , positive action opening, breaking or engagement visualisation.

- selfcleaning silver plated copper contacts.

Comply with EN 60 947-3.

#### Options

- extended handle;
- auxiliary contact.

### Load break switches with handle

Insulating voltage Ui:

from 160 to 400A: 800V AC  
630A: 1000V AC

Connection:

In 160A: 95 mm<sup>2</sup> max.  
In 250A: 150 mm<sup>2</sup> max.  
In 400A: 240 mm<sup>2</sup> max. or  
2 x 150 mm<sup>2</sup> max.

Delivered with:

- 1 lockable handle
- fixing screws and nuts
- tightening programming segments

### Characteristics

The range of enclosed LBS has been designed to match the TP&N range of distribution boards. The number of enclosure sizes has been optimized, to ensure an easy installation.  
The LBS products are designed to isolate individual circuits. The range is presented in surface mounting enclosures and includes 2 versions of boxes :  
 - TPN 20-1600A (14 ratings)  
 - TPSN 20-1600A (14 ratings)

### Delivered with

- load break switch
- plain door
- extended rotary handle

### Technical data

- nominal current (In): 20A up to 1600A
- rated voltage (Ue): 415V AC
- utilisation category: AC23A / AC23B / AC22B
- colour: epoxy powder coating RAL 9002
- metallic enclosure
- 1.2mm thickness
- extra cabling space

### Comply with

IEC 60947-3, EN 60947-3  
Sequence 1, 2 and 3

# Modular protection devices

We offer a wide range of modular protection devices, such as MCBs, RCCBs, RCBOs, HRC fuse carriers and motor starters.

---

Miniature circuit breakers (MCB)	102
Residual current breakers with overcurrent protection (RCBO)	114
Residual current circuit breakers (RCCB)	115
Auxiliaries	118
Motor starters	120
HRC fuse carriers	121

---

### Characteristics

Protection and control of circuits against overloads and short-circuits in electrical installations. Allows to isolate circuits.

### Complies to the standard IEC 60898-1

#### Technical data

- breaking capacity: 3000A (as per IEC 60898-1)
- voltage: 230/400V AC
- current: 6A to 40A
- frequency: 50/60Hz
- tripping curve:
  - B curve: 3 to 5 ln
  - C curve: 5 to 10 ln

#### Technical features

- bi-connect (cable & busbar)
- supply feed either top or bottom
- will not accept auxiliaries
- poles: 1P, 2P, 3P, 4P (protected poles)
- climate sealed: T2
- trip free mechanism

#### Connection capacity

- flexible: up to 16 mm<sup>2</sup>
- rigid: up to 25 mm<sup>2</sup>

### Characteristics

Protection and control of circuits against overloads and short-circuits in electrical installations. Allows to isolate circuits.

### Complies to the standard IEC 60898-1

#### Technical data

- breaking capacity: 10kA (as per IEC 60898-1)
- voltage: 230/400V AC
- current: 6A to 63A
- frequency: 50/60Hz
- tripping curve:  
    B curve: 3 to 5 ln  
    C curve: 5 to 10 ln

#### Technical features

- bi-connect (cable & busbar)
- supply feed either top or bottom
- will accept auxiliaries
- poles: 1P, 2P, 3P, 4P (protected poles)
- climate sealed: T2
- trip free mechanism

#### Connection capacity

- flexible: up to 16 mm<sup>2</sup>
- rigid: up to 25 mm<sup>2</sup>

### Characteristics

Protection and control of circuits against overloads and short circuits in electrical installations. Allows to isolate circuits. They can be used for installation in commercial building and industrial premises.

**Complies to the standard IEC 60898-1, IEC 60947-2**

### Technical data

- breaking capacity
  - 10 kA (IEC 60 898-1)
  - 10 kA (IEC 60 947-2)
- voltage: 230/400V AC
- current: 80A to 125 A

- frequency: 50/60Hz
- tripping curve:
  - B curve: 3 to 5 In,
  - C curve: 5 to 10 In

### Technical features

- supply feed either top or bottom
- will accept auxiliaries
- poles: 1P, 2P, 3P, 4P (protected poles)
- climate sealed: T2
- trip free mechanism

### Connection capacity

- flexible: up to 50 mm<sup>2</sup>
- rigid: up to 70 mm<sup>2</sup>

### Characteristics

Compact protection devices which combine the overcurrent functions of an MCB with the earth fault functions of an RCCB in a single unit. These devices are single pole & solid neutral.

### Complies to the standard IEC 61009-1

#### Technical data

- tripping curve:  
C curve: 5 to 10 In
- sensitivity:  
high sensitivity: 10mA, 30mA  
medium sensitivity: 100mA, 300mA
- voltage: 230V AC
- current: 6A to 40A
- frequency: 50Hz / 60Hz

- type: AC type (Ensured for residual sinusoidal alternating currents, whether suddenly applied or slowly rising)

#### Technical features

- bi-connect (cable & busbar)
- flying neutral lead length: 700mm
- will not accept auxiliaries
- poles: SP & passing N
- climate sealed: T2
- trip free mechanism
- fixed instantaneous tripping

#### Connection capacity

- flexible: up to 16 mm<sup>2</sup>
- rigid: up to 25 mm<sup>2</sup>

32	1	1	-	<b>ACC232Y</b>

### Characteristics

Protection and control of circuits against earth leakage currents, between line and earth, and/or neutral and earth. Protects against electrical shocks.

### Complies to the standard IEC 61008-1

### Technical data

- sensitivity: 10mA, 30mA, 100mA, 300mA, 500mA
- voltage: 240V (2P) and 240/415V (4P)
- current rating: 16A to 125A
- frequency: 50Hz
- type: AC type (Ensured for residual sinusoidal alternating currents, whether suddenly applied or slowly rising)

### Technical features

- label holder (up to 63A)
- IP2X terminals (up to 63A)
- bi-connect (up to 63A)
- earth fault indication (yellow = tripped)
- ON/OFF indication
- will accept auxiliaries
- climate sealed: T2
- trip free mechanism
- fixed instantaneous tripping

### Connection capacity

- flexible: up to 16 mm<sup>2</sup>
- rigid: up to 25 mm<sup>2</sup>

### Residual Current Circuit Breakers (RCCB) onekonekt

### Residual Current Circuit Breakers (RCCBs)

Compact devices which provide earth leakage protection (protect against electrical shocks by direct or indirect contacts).

To open automatically in the event of an earth fault between phase and earth and/or neutral and earth.

### Technical information

#### - AC type

Ensured for residual sinusoidal alternating currents, whether suddenly applied or slowly rising

#### - A and HI type (reinforced immunity)

In addition to the characteristics of AC type, it ensured for residual pulsating direct currents, whether suddenly applied or slowly rising.

They are used whenever fault currents are not sinusoidal.

HI types only: It reduces the unexpected tripping when they protect equipment generating disturbances like DC fault current (washing machines, speed drives, microprocessing, electronic ballast...).

Note: to fit auxiliaries contact, alarm contact, for all tripping auxiliaries we have to use the dedicated auxiliaries CZ001

### RCCBs

#### - sensitivity:

- high sensitivity: 10, 30mA instantaneous tripping (fixed)
- medium sensitivity: 100mA, 300mA instantaneous or selective tripping (fixed)
- current rating: 16 to 100A
- voltage rating: 230V AC (2P) and 400V (4P)
- poles: 2P and 4P
- types: AC, A and HI types

#### - frequency: 50Hz

- connection capacity
- 25 to 63A:

over and undervoltage auxiliary	1	<b>MZ214</b>

MZN175

### Locking kit

- allows locking of the device dolly in the on/off position
- will accept two padlocks with hasps of 4.75 mm diameter max.

Description	Cat. ref.
locking kit	<b>MZN175</b>

MZN177

### Marking strip

Description	Cat. ref.
13 modules for modular devices	<b>MZN177</b>

To ensure localised control and protection of single and three-phase motors. The rated motor current is set on the motor starter units by means of a current dial (in the front).

#### Technical data

- Adjustable thermal relay
- AC3 utilisation category
- Connection capacity: conductor cross-sections of the motor cables:
  - flexible 1 to 4 mm<sup>2</sup>
  - rigid 1 to 6 mm<sup>2</sup>

#### Options

Undervoltage release: MZ528N, MZ529N

Auxiliary contacts: MZ520N, MZ522N

Alarm contact: MZ527N

Shunt trip: MZ523N

Comply with IEC/EN 60947 for low voltage switchgear.

The motor starter wiring should be implemented in compliance to IEC/EN 60947-1 table 9.

#### Breaking capacity

# Power, control and signaling interfaces

Power, control and signaling products are the complementary devices of a distribution board.

They allow to control and isolate circuits in residential and commercial installations.

---

Modular contactors	124
Latching relays	125
Modular switches	126
Modular changeover switches	129
Indicator lights	131
Earth leakage relays and toroidal transformers	132
Brass distribution terminals	133
Supply busbars	134

---

**Characteristics**

Contactors are power devices necessary for the remote switching and control of power circuits like heating circuits, lighting, ventilation, etc. It is recommended to associate them with command and energy management devices (time switches, thermostats, delay timers, etc).

**Complies with IEC 61095**
**Technical data**

- standard contactors range: 1, 2 and 3 module width
- power contacts rating: 230V AC or 400V AC, 50/60Hz
- without manual override control
- ratings: 25A, 40A, 63A
- utilisation categories: AC-7a / AC-1, AC-7b / AC-3

**Recommendations**

- the use of LZ060 (heat dissipation inserts) is strongly recommended every 2 contactors mounted in a row or between contactors and adjacent devices
- the use of the auxiliary contact ESC080 is not compatible with 1 module width low noise contactors

**Connection capacities**

- for 25A contactors:
  - 10mm<sup>2</sup> rigid conductor
  - 6mm<sup>2</sup> flexible conductor
- for 40A, 63A contactors:
  - 25mm<sup>2</sup> rigid conductor
  - 16mm<sup>2</sup> flexible conductor
- for coil connection:
  - 10mm<sup>2</sup> rigid conductor
  - 6mm<sup>2</sup> flexible conductor

**230V AC - 50 Hz control coil voltage**

**ESC225**

**ESC425**

### Characteristics

Permits the remote control of a lighting circuits from several points using push-buttons in private buildings, small industry buildings and administration buildings. Latching relays operate when impelled by a signal voltage. The impulse can be provided via a push button or switch. The first pulse operates the relay and latches it into its set (opposite) state, the next operation of the push button returns the relay into its reset (original) state.

**Complies with IEC 60 669-1 and IEC 60 669-2-2**

### Technical data

- nominal voltage of the power circuit: Un = 250/400 V AC

- nominal voltage of the power circuit: 12V, 24V, 48V and 230 V AC
- nominal voltage of the control circuit: 12V, 24V, 110V DC
- conventional thermal current: 16A AC1
- control and power circuits
- nominal frequency: 50/60Hz
- contact types: 1NO, 2NO, 1NC+1NO, 4NO, 2NO+2NC, 3NO+1NC
- 4 types of auxiliaries

### Connection capacity:

- rigid 10 mm<sup>2</sup>
- flexible 6 mm<sup>2</sup>

### Characteristics

Modular switches are used as general switches in electrical low voltage distribution boards and for the isolation of loads during the interventions of maintenance.

### Technical data

- 3 sizes are available:
  - Size 1: In 16 A, 25 A, 32 A
  - Size 2: In 32 A, 40 A, 63 A
  - Size 3: In 63 A, 80 A, 100 A, 125 A
- 230/400V 50/60 Hz
- utilisation category AC22A from 16A to 125A for mixed alternative load (inductive and resistive)
- version with light indicator in 1 and 2 poles from 16 to 32A
- IP2X with terminal shrouds
- all switches have a green/red indication on the toggle giving positive contact position
- MZN175 padlocking kit allows to lock in the ON and OFF position

ESC080

**Accessories**

Description	Pack qty	Cat. ref.
auxiliary contact compatible with switch disconnectors from 16 to 125 A, 6 A, 230 V AC	1	<b>ESC080</b>
terminal shroud for switches 32 A to 125 A	4	<b>MZN120</b>
phase barrier shield	set of 3	<b>MZN121</b>
padlocking kit	1	<b>MZN175</b>

**Characteristics**

The changeover switch range is the solution to guarantee supply of load by controlling 2 power circuits.

**Technical data**

In from 25A to 63A  
 - use category AC22A from 25A to 40A for mixed alternative load, inductive and resistive (AC21A for 63A)  
 - IP2X with terminal shrouds  
 - frequency 50/60 Hz

MZN175 padlocking kit allows to lock in the ON and OFF position.

**Connection capacity**

In 25 A and 40 A  
 16 mm<sup>2</sup> rigid conductor  
 10 mm<sup>2</sup> flexible conductor

In 63A  
 25 mm<sup>2</sup> rigid conductor  
 16 mm<sup>2</sup> flexible conductor

Complies with IEC 60 669-1, IEC 60947-3

### Characteristics

These products are used for remote controlling signalisation of any event in any electrical installation (domestic, tertiary & industrial).

LED technology providing longer life, new design, integrated label holder.

### Push buttons

- versions: impulse push buttons and latching push buttons,
- contact types: 1NO, 1NC, 2NO, 2NC, 1NC+1NO

### Indicator lights

- light type: LED technology
- supply voltage: 12/48V AC/DC and 230/415V AC
- colors: green, red, orange, blue, clear

- range: 1,2 and 3 indicators light possibility in the same device

- power consumption: 0.8 watts

- burning hours: up to 100,000h

These versions with indicator lights are equipped with green or red diffuser. (led technology)

### Connection capacity

- 10 mm<sup>2</sup> rigid,
- 6 mm<sup>2</sup> flexible

Comply with IEC 60947-5-1 and IEC 62094-1

SVN122

clear LED light	1	12	<b>SVN135</b>
green/red LED light	1	12	<b>SVN136</b>

**Earth leakage relays**

- Voltage range : 230V +/- 20%
- Network voltage: 50 to 700 V
- Frequency: 50 / 60 Hz
- Working temperature: -10 to +55°C
- Storage temperature: -25 to +70°C
- Max. cable length to toroids: 25m non-twisted cable 0.5 to 1.5mm<sup>2</sup> 50m twisted cable
- Standards: IEC 60755, IEC 947-2 annex B, IEC 61543, IEC 61008-1, IEC 61000-6, IEC 60755

#### Insulated universal supply busbars

- blue for neutral,
- brown for phase
- for MCB's and fuse carriers 1 module width

#### Single, double, three and four pole busbars

- for multipole MCB from 0,5 to 63A
- for multipole, fuse carriers and SB switches

Comply with IEC 60947-7 and IEC 60439-1.

### Single Phase Direct Connect kWh Meters - MID Approved

**Description:**

- MID approved meter range (except EC...180T)
- A range of both direct connect and CT supplied din rail mounted meters

**Characteristics:**

- CT supplied meters compatible with 1 A / 5A CT's (not suitable for use with cables / ct's from page 38) - Choice of communication options – pulse output kWh, Modbus or Mbus

# Track, communicate, optimise

**:hager**

# Energy and lighting control

Energy and lighting control product range, includes automatic management of lighting, timers, dimmers and time switches. They allow to optimise energy consumption while increasing comfort in residential and commercial premises.

Smarter choice for lighting

# Make the brighter choice

**Motion detectors**  
are best for spaces where people pass through, such as hallways and car parks.

**Presence detectors**  
are designed for areas such as offices and waiting rooms, where people sit still for long periods.

Lighting control plays an important role in modern homes & buildings. It is not only to produce ideal living and working conditions

but also to achieve the best possible energy balance. On-demand lighting solutions from hager helps users to reduce energy costs for lighting.

For more info scan here:

### Characteristics:

Our range of motion & presence detectors are the perfect solution for cost-effective lighting control and energy efficiency in buildings. These detectors switch On/Off lights according to human movement & ambient light levels. They provide a simple and effective solution for increasing comfort, safety, security and energy saving in commercial, residential & industrial buildings.

They are suitable for both indoor and outdoor environments making them ideal for diverse applications such as parking areas, lift lobbies, corridors, hotel rooms, conference rooms, offices, homes and public buildings. Matching with different detection applications and installation specifications, the detectors are available with a mounting set for wall, ceiling and corners.

EE840

### Motion detectors IP55

- 230V AC (50/60 Hz)
- output: 10A AC1 relay
- IP55
- for indoor or outdoor use
- IP55 reinforced waterproofing
- 140/220/360° frontal detection zone

#### Description

- can be mounted on walls, in corners or to ceilings utilizing the relevant mounting accessory
- response brightness adjustable
- delay time adjustable
- adjustment achieved locally via potentiometers
- Complies with EN 60669-1 & EN 60669-2-1

Cat. ref.

140° white

**EE820**

200° white

**EE840**

360° white

**EE860**

EE804A

EE805A

### Motion + presence detectors IP21

- 230V AC (50/60 Hz)
- output: 10A AC1 relay
- IP21
- combination of presence and motion detector with enhanced detection sensitivity in the central presence-detection area

#### Description

- Available for surface(EE804A) and flush (EE805A)
- response brightness adjustable
- delay time adjustable
- adjustment achieved locally via potentiometers
- factory presets: Lux = 200, Time = 3 Minutes
- Coverage 360°, Diameter 6m @ 2.5m (motion), enhanced detection area 4m Diameter (presence) @ 2.5m
- Complies with EN 60669-1 & EN 60669-2-1

Cat. ref.

360° surface mounting, white

**EE804A**

360° flush mounting, white, 75mm Ø

**EE805A**

EE883

### HF motion detector (hyper frequency) IP54

- 230V AC (50/60 Hz)
- output: 10A AC1 relay
- IP54
- detection zone of 8m
- detection area 360°

#### Description

- response brightness adjustable
- delay time adjustable
- adjustment achieved locally via potentiometers
- hyper frequency (HF) detection, independent of temperature detection
- Complies with EN 60669-1, EN 60669-2-1, EN 301489-1 & 3, EN 300440-1 & 2

Cat. ref.

surface mounting, white

**EE883**

EE815

### Presence detector flush mounting

- 230V AC
- output: 16A AC1 relay
- IP41
- programmable for absence or presence
- range 7m diameter for large

- movements, 5m diameter for small movements
- lux level and ON delay setting via potentiometers
- or remote control
- factory presets, lux = 400, time = 20 min, presence detection
- complies with EN 60669-1 & EN 60669-2-1

#### Description

Cat. ref.

360° white

EE808

### Infra-red remote control

- for EE81x

#### Description

Cat. ref.

for the installer (settings)

**EE807**

for the customer (lighting control)

**EE808**

# More capabilities Less consumption

## Reliable detection

The new motion and presence detectors are equipped with sensitive passive infrared (PIR) technology. They react to differences in temperature and motion and can detect body movements as well as smaller movements. The area of motion detection comprises 6 m in diameter, while the presence detection covers a diameter of 4 m at an installation height of 2.5 m. The recommended installation height is between 2.5 and 3.5 m, with 4 m as an absolute maximum.

## Quick installation

The EE804A mounted device consists of a detachable lower section with screw-fit connection terminal. It can be attached to any standard socket or mounted directly on the ceiling. The upper section, in which the detection optics are located, is then plugged in and screwed into place. Once that's done, it's all ready to use!

The EE805A installed device is equipped with a rapid mounting system consisting of spring clamps – robust enough to keep the detector resistant to vibration on the suspended ceiling, yet flexible enough that it can be taken out to adjust the settings on the potentiometer. To link it up, simply connect the cables via a plug-in terminal. Strain relief with cable ties ensures long-term secure contact.

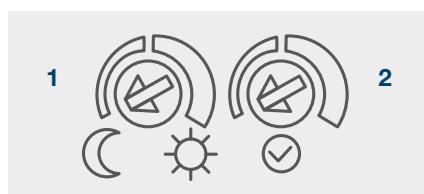

EE805A installed device,  
rear view

## Easy to set up

The user can set up and adjust all major lighting parameters via two easily accessible potentiometers:

- **Potentiometer 1** adjusts the response brightness (between 5 and 1000 lux), allowing the lighting to be optimally adapted to the daylight.
- **Potentiometer 2** controls the duration of the luminescence (between 2 sec and 30 min).

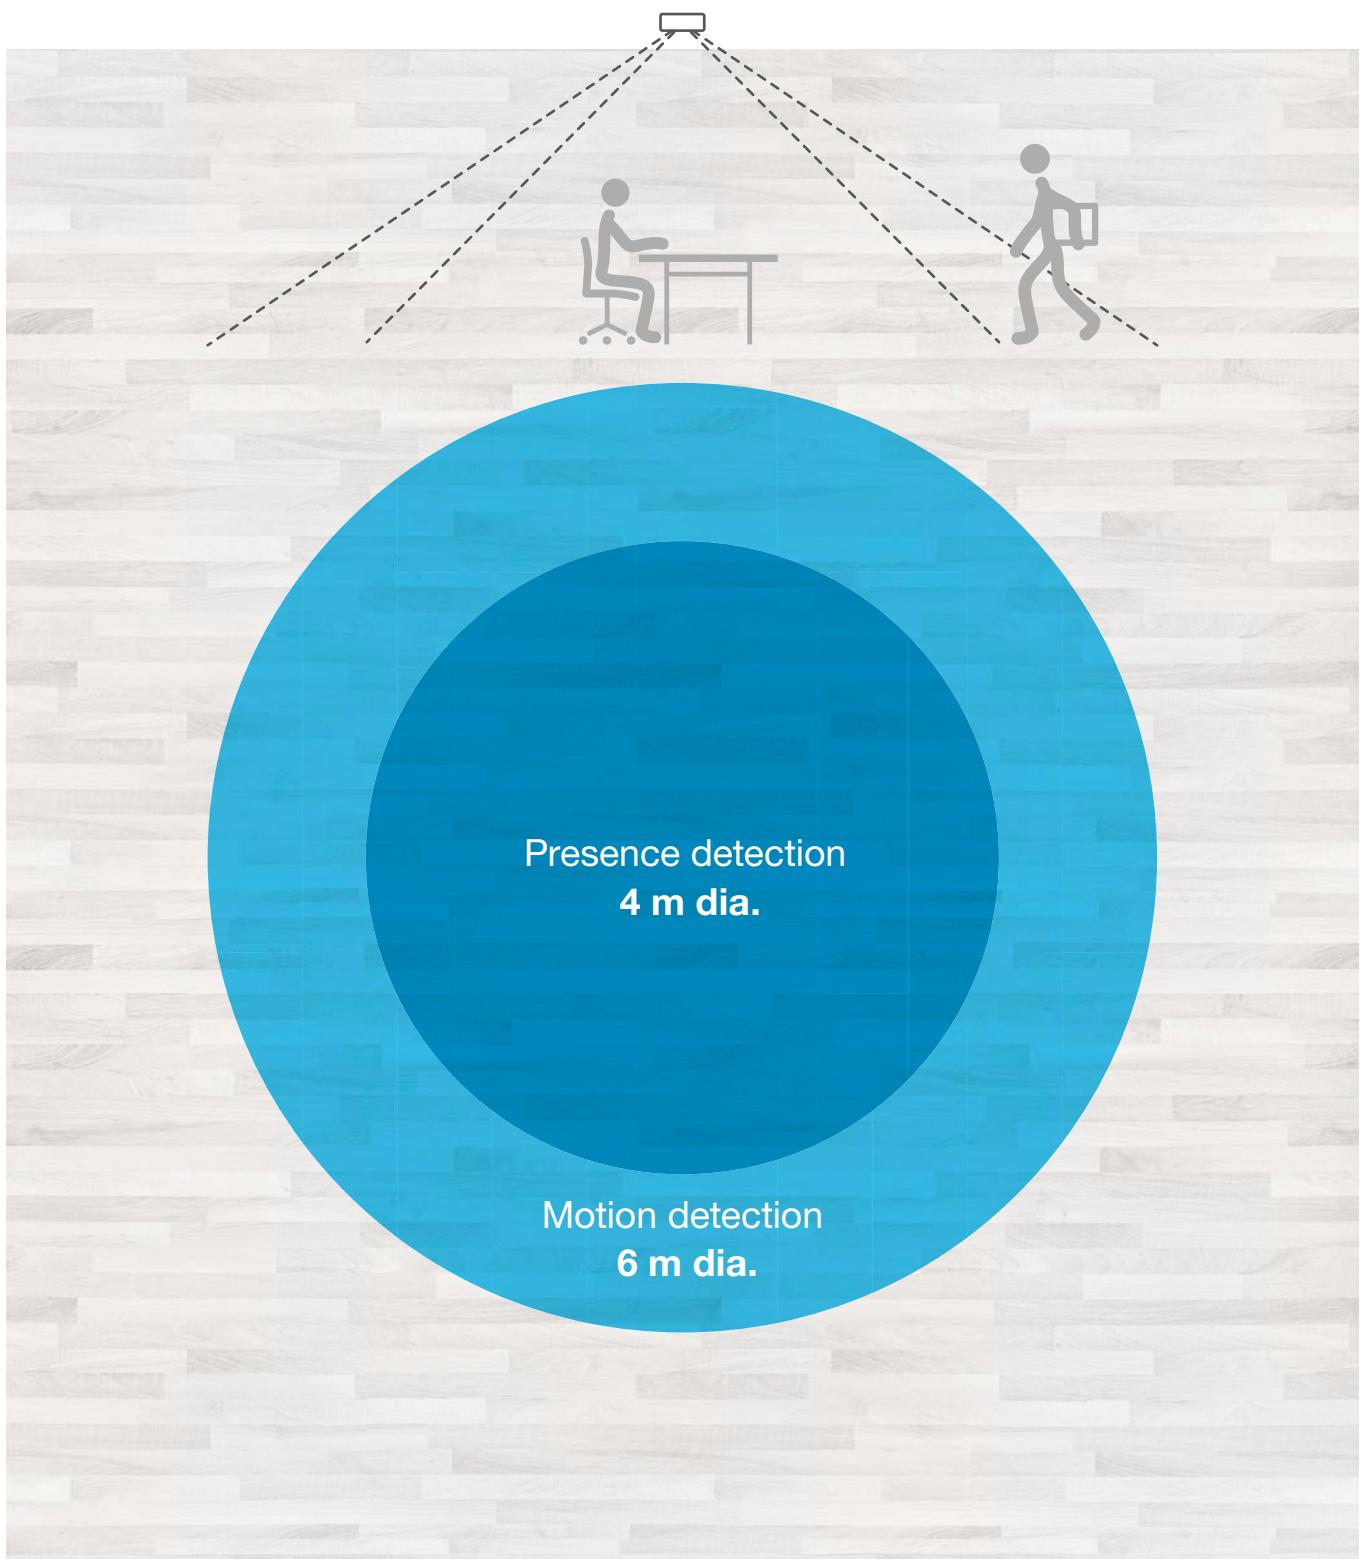

## Long-term energy savings

Modern lighting fixtures such as LEDs and halogen lamps often have high inrush currents, sometimes up to 1000 times your nominal current. This puts a strain on the contacts of the connected motion and presence detectors and can lead to premature wear of the relay. To prevent this, the new detectors from Hager have been equipped with zero-cross switching for the first time. This calculates the zero-crossing of the AC voltage and keeps the inrush current to a minimum – thus sparing the relay contacts and extending durability, even in high switching occurrence.

## Long-term savings

The electricity prices for private households have risen by 56% over the last ten years. It's therefore a good idea to install motion and presence detectors, as they save up to 90% of lighting energy by switching on lights strictly when they are needed. Not only that, but the new devices by Hager will win over your customers with an extremely low standby consumption of just 0.3 W. So now they have two good reasons to invest in a detector!

**Energy savings  
of up to 90%**  
**Standby consump-  
tion of only 0.3 W**

**Characteristics:**

Time lag switches are designed to save energy and ensure safety. For example: for building stair-case or cellar lighting, ventilation, pumping, etc... these devices provide control of lighting circuits with automatic switch-off after a pre-set time (e.g. for staircase, corridors lighting). Compact design with a 2 position switch permanent/timed lighting implementation facility

**Complies with EN 60 669**
**Technical data**

- supply voltage: 230V 50/60Hz
- cut-off power: 16A - 250V AC1
- consumption: 1VA
- time delay: 30 s to 10 min
- protection degree: IP20
- current limiting: 100mA EMN001
- connection capacity:
  - 6mm<sup>2</sup> flexible
  - 10mm<sup>2</sup> rigid

EMN001

**Standard stair case time lag switch**

- press shortly a push button to switch ON the light
- after an adjustable time "T", the light switch OFF automatically

standard stair case time lag switch	1	6	<b>EMN001</b>

EMN005

**Multifunction stair case time lag switch**

Description	Width in modules	Pack qty.	Cat. ref.
multifunction stair case time lag switch 4 functions: - basic mode - prewarning mode - double delay mode - double delay + prewarning mode	1	1	<b>EMN005</b>

**Analogue time switches**
**Characteristics:**

Time switches allows users to set programs for switching loads On and Off. These switches are ideal for both domestic and commercial applications and can be used to control various electrical devices such as lighting, household appliances, signboards, shop windows, and more. Not only do they provide convenience, but they also help save energy and improve overall comfort.

**Complies with IEC 60730-2-7**
**Technical data**

- supply voltage: 230V AC, 50Hz
- battery reserve: for 24h and 7 days versions
- output: 1 NO voltage free changeover contact 16A, 250V AC1
- programming by captive segments
- manual override on 1 module devices: automatic and permanent ON
- manual override on 3 module devices: automatic, permanent ON and permanent OFF

**Connection capacity**

- 1.5 mm<sup>2</sup> max, rigid

EHN110

*EHN10 & EHN110 – suitable for 50Hz operation only.*

To provide all types of automatic control i.e. lighting, ventilation, watering, machine pre-heating, automatic door and visual audible indication, cycle control etc.

For timing and automation in domestic and commercial premises.

The input signal can be via various switching devices (pushbutton, latching switch, timeclock etc) and the timed output used to control the application.

### Technical data

- voltage supply range:  
12 and 24 to 48V DC  
12 and 24 to 230V AC
- adjustable time delay: from 0.1s to 10hrs
- LED indicator frequency: 50/60 Hz
- 1 potential free changeover contact
- breaking capacity: 8A / 230V AC

6mm<sup>2</sup> max rigid  
1.5 - 10mm<sup>2</sup> flexible

Complies with - EN 60669-1, EN 60669-2-1

multifunction  
6 individual functions including: delay on,  
delay off, timer,...

### Characteristics:

There are 3 solutions to control automatic lighting for night lighting such as neon signs, showcase, exterior surroundings, public lighting (streets, monuments):  
 - modular twilight switches,  
 - surface mounting compact twilight switches,  
 - astronomical time switches.

The twilight switches control light systems according to natural illumination. A photoelectric cell measures the light level and in conjunction with the relay provides ON/OFF control of a circuit.

Astronomical time switches are electronic weekly programming clocks designed to control various loads automatically according to sunrise and sunset times to optimized the energy saving.

### Technical data

- supply voltage: 230V AC ±15%
- frequency: 50/60Hz
- maximum load: 16A / 250V AC1,
- loads: incandescent, halogen, and fluorescent lamps,
- max length between 2 modular devices: max. 50 m.

Connection capacity:

- rigid: 1.5 to 10mm<sup>2</sup>
- flexible: 1 to 6mm<sup>2</sup>

Complies with IEC 60669-1, IEC 60669-2-1, IEC 60730-2-7

EEN100

# Weatherproof Range

Our range of weatherproof solutions are engineered to withstand the tough environmental conditions that Middle East weather can demand.

---

IP 55 switches & sockets	162
IP66 switches & sockets	163
IP66 isolator	164

---

**Characteristics:**

The IP55 range of switches and sockets are perfect for both indoor and outdoor use. They are specially designed for areas frequently exposed to dust and splashing water like gardens, balconies, car parking and swimming pool areas.

These switches and sockets provide some dust ingress protection and are safeguarded against low-pressure water jets from any direction, making them an ideal choice for all your electrical needs. The clear membrane cover allows visible indication of the switch status (on/off).

**IP55 Wall switches**
**Technical features**

- Available in 1, 2 and 3 gang
- Clear silicon gasket allows operation of switch without lifting cover
- Clear silicon gasket is replaceable
- Large switch rocker allows easy operation
- Mounting screw locations are segregated from the back box by gaskets for improved IP installations
- IP rated cable gland included

**Complies to the standard :**

**IEC / BS EN 60529: IP 55**  
**BS EN 60669-1: switches**

**Technical data**

- protection category: IP55
- 250V 10AX rated switches
- 1 way and 2 way switches
- 20mm<sup>2</sup> conduit entries available on all sides

**Connection capacity**

- Switch terminals capable of taking 3 x 1.5mm<sup>2</sup> or 2 x 2.5mm<sup>2</sup> cables
- Earth terminal mounted in back box

XPW5120 / 5110

Description	Cat. ref.

10AX 3 gang 2 way switch	XPW5320
20AX 1 gang double pole switch	XRW5200
1 gang bell press	XPW5910

**IP55 Socket Outlets**
**Technical features**

- Available in 1 and 2 gang
- Clear silicon gasket allows operation of switch without lifting cover.
- Clear silicon gasket is replaceable.
- Large switch rocker allows easy operation.
- Mounting screw locations are segregated from the back box by gaskets for improved IP installations.
- IP rated cable gland included.

**Technical data**

- protection category: IP55
- 250V 13A sockets
- 1 gang and 2 gang versions
- 20mm<sup>2</sup> conduit entries available on all sides

**Connection capacity**

- Socket terminals capable of taking 3 x 2.5mm<sup>2</sup> or 2 x 4mm<sup>2</sup> cables
- Earth terminal mounted in back box.

**Complies to the standard :**

**IEC / BS EN 60529: IP 55**  
**BS 1363 : sockets**

XSW5213

Description	Cat. ref.
13A 1 gang unswitched socket	XSW5113
13A 2 gang unswitched socket	XSW5213
13A 1 gang DP switched socket	XSW5114
13A 2 gang DP switched socket	XSW5214

XPW5114

## Characteristics:

The IP66 range of switches and sockets are suitable for use in both indoor and outdoor environments, and in areas where there is a potential risk of dust or water penetration. These IP66 rating provides complete protection against dust and high-pressure jets of water from all directions.

Constructed from a UV stabilized & chemically resistant polycarbonate material, they are designed to endure the most challenging outdoor conditions.

## IP66 wall switches

### Characteristics:

- Complies to IEC / BS EN 60529 for IP66 rating
- Switches comply to BS EN 60669-1, a.c.
- Robust and rugged enclosures designed to withstand harsh weather

WXPPS12

Description	Pack qty.	Cat. ref.

## IP66 fused connection units

### Characteristics:

- Complies to IEC / BS EN 60529 for IP66 rating
- Complies to BS 1363-4
- Robust and rugged enclosures designed to withstand harsh weather

- Unique double hinge allows lid to open a full 180°
- Fixing point for padlock
- Box size: 103 x 116.5 mm
- Cable entries :
- side: 4 x 20 mm
- back: 1 x 20 mm and 1 x 25 mm

WXPSSU83FO

Description	Pack qty.	Cat. ref.
13A DP switched fused connection unit with flex outlet	1	WXPSSU83FO
13A unswitched fused connection unit with flex outlet	1	WXPSU83FO

**Characteristics:**

The range of IP66 isolators are designed to be used in outdoor applications with IP66 degree of protection. They are rated at AC23A and offer options of 2, 3 poles and 4 poles with switched neutral. They are compact and easy to install with 2 screw quick release top cover.

**Complies with BS EN 60947-3, IEC 60947-3**

**Technical data**

- Rated voltage:  
250 V AC  
440 V AC
- Material: polycarbonate – UV grade.
- Utilisation category: AC23A
- For switching of motor loads or other highly inductive loads
- Protection category: IP66

# Robust & Safe

Manufactured from a tough, durable thermoplastic, the IP66 range is ideal for indoor and outdoor applications where wiring accessories may be vulnerable to the potentially harmful effects of dust or water ingress.

See more about IP66 on our website [www.hager.com/middle-east](http://www.hager.com/middle-east)

# Cable management

For easy and safe cabling:

The slotted trunking products and under floor systems provide versatile solutions for various kinds of applications from electrical distribution to automation panels.

---

tehalit.BA7A slotted trunking	168
Underfloor systems	170

---

- wide-slot/web design for a wide range of wire bundle sizes
- temperature range from -5 °C to +60 °C
- flame-retardant according to UL94-V0, UL-recognized and CSA-certified
- EN3-2-50085-approved, VDE and CE marking
- slot 6 mm, web 6.5 mm
- colours: grey RAL 7030
- material: PVC rigid
- wiring duct length: 2 meters

**Characteristics:**

Screed floor system offers you great functionality, as it is the most frequently used technology for floor installation. The floor boxes are interconnected via conduits or trunkings, allowing an optimized supply of the building as well as a direct access from the floor to electrical power, data and telecommunication.

**Technical data**

- Galvanised steel
- Rust protection
- Adapted for conduits with a diameter of 25mm
- Special plate adapted for trunking installation (25 or 38 mm height)
- Supply unit made of polyamide according to EN 50085-2-2

**Application**

- 3 compartments
- Mounting in screed
- Height adjustable by lid and frame, 80 - 110 mm

**Plates:**

- Function as an outlet box to install power and data

**Lid:**

- For dry rooms with dry cleaned floors
- Carpet or tile flooring height of 8 mm
