

Flexibility. Simply anywhere.

Fully integrated
solutions for floors,
walls and ceilings.

:hager

**The answer
to today's
challenges?**

Getting electrical power to any place of a building means navigating and creating perfect routes for the installation. The more evolving our buildings and our ideas with them become, the more flexible it has to be. This is why Hager offers solutions that act as one integrated system: Floor distribution, wall trunking and ceiling systems that fit together seamlessly. Efficient, aesthetic, modular, customizable to individual needs, ready for now – and for anything ahead.

It's easier than you may think.

01

Floor Solutions

With more open space and glass walls, intelligent floor solutions offer even more flexibility for planning, installation and design.

02

Wall Solutions

Walls play a crucial role in electrical installations. Recessed and invisible or with trunking solutions as a part of the overall design concept.

03

Ceiling Solutions

Make way for more possibilities and safer grounds. Ceiling solutions reduce trip hazards and add more flexibility.

Building Information Modeling has become the standard for digital planning. Hager offers a large collection of BIM objects for more and more products and parts.

bimobject[®]

Floors. The base of it all.

Floor distribution is a demanding field. And there is good reason for that. With more glass facades, open concepts and an ever-changing environment it gives any installation a solid foundation. And it acts as the backbone for inspiring new room concepts and usages within short time frames. If this sounds like the challenges you have to meet, here are real down-to-earth solutions to work with.

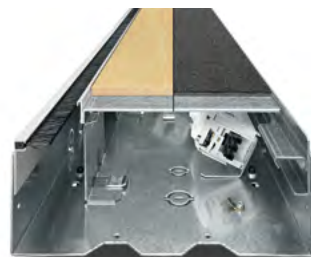

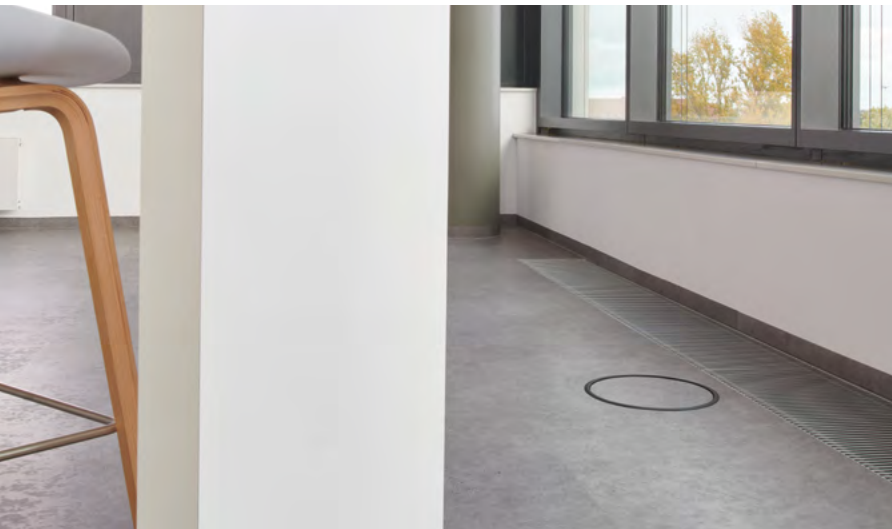

“Planning an installation with Hager means ‘forget about limitations’. In fact, it’s more about embracing new options!”

Jean Farresse
Electrical consultant

Just your way.

Any coating and any configuration is possible: Let us know what your plans are!

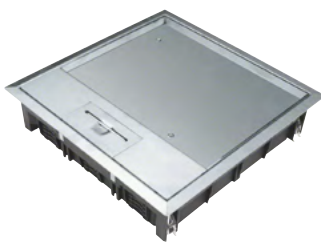

Solutions for floors.

Clean and discrete, with mechanical stability and user-friendly design, our floor solutions are always around instead of being in the way. In any given room design.

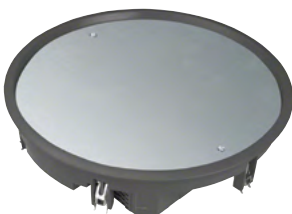

Dry cleaned or wet cleaned floors, screed, wood, carpets, innovative materials: The choice is up to you.

VQ/VR/VE: The highly versatile, discrete solution.

- Versatile** – for any type of coating such as carpet, tiles, inox, wood
- Modular** – time-saving, adjustable equipment
- Safe** – safe locking system
- Clever** – with pinch-proof cable cover

Walls. Plug and work!

A sharp focus on any detail: This is how Hager makes installation jobs easy, clean and flexible, no matter what.

The classic solution.

Hager offers tailor-made trunking systems for almost any challenge within commercial buildings.

Easy to plan. Fast and efficient to install. Flexible and evolving to use. An electrical installation with cable trunking systems is as classic and timeless as it is future-proof. With “snap-in trunking” solutions any given wall can become a multioptional distribution surface, bringing electrical power anywhere it is needed.

The BR family – totally flexible

Versatile – 4 sizes, 4 materials,

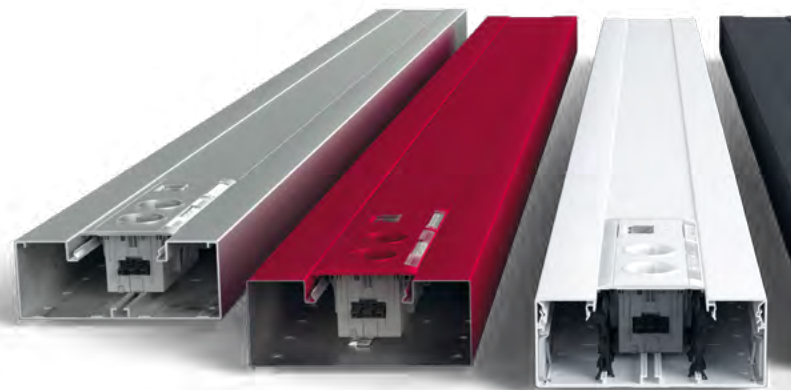

3 standard colours, all RAL colors

Flexible – fits seamless with Berker products

Safe – complete range entirely filmed and self-earthing

Variable – +/- 5° angle, fast front mounting

Practical – configurator for fast, efficient planning

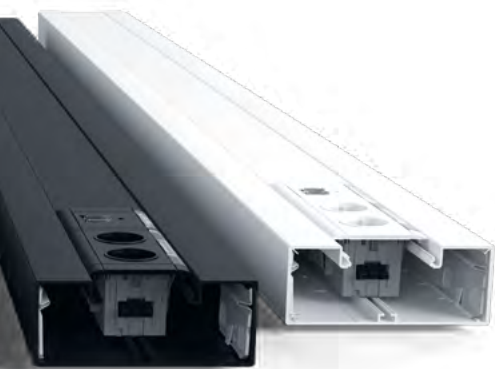

Traffic white!

White is a real design trend. Now available: BR trunking systems in fresh traffic white (RAL 9016).

Solutions for walls.

Distribute energy and data in a both
classical and easy, fast fashion.
The BR family meets any challenge.

BKIS system: Elegantly integrated trunking.

Aesthetic – nice discrete design

Safe – limited bacterias

Practical – easier to furnish

Versatile – 25mm partition wall (or 12.5mm),
with high mechanical resistance, 1 or 2 compartments

Modular – for an efficient, evolving installation

Ceilings. Above all, more possibilities.

Systems for ceiling distribution grant additional space and more safety on the ground, as fewer cables get into the way. Easily connected with pole systems that meet the highest standards in design and technology they bring access to electricity and data anywhere in the room. Start from scratch with a brand new building. Introduce fully new usage concepts. Or make way with renovation projects that infuse new life to historic buildings: with Hager, there are many good reasons to look up more frequently.

Safe and separated.

We keep things in separate compartments. That's not only safe, it also offers more flexibility if there are changes or new IT installations.

ore

Today, it's all about mobility – including electrical installations. Hager offers solutions that help you moving ahead.

Solutions for ceilings.

Easy-to-install and pre-configured these columns bridge the space between floor and ceiling. For cleaner, safer working places.

DES: Great looks meet fast installation

Solutions without limits.

Individual solutions that translate customer ideas and building concepts into reality – even if it's a first of its kind. With the right systems, parts and variations right where you need them. Planned and ordered with an ease, assisted and guided by BIM, hagercad – and experts who are always on your side. We are happy to work with you.

**This is Hager:
robust, reliable design,
functionalities that
make sense and
thoughtful details.**

Floor box

Stay as flexible as you need:
Our floor boxes are highly combinable
(VE-EE fits systems AK, BK and UK,
BKB is a standalone system)

It's all about compatibility.

They are the perfect partner for any project: Wiring accessories for all floor, wall and ceiling solutions. All of them match perfectly, putting together functionality, connectivity and design. Turn any installation into a winning team – it's easier than ever.

SL

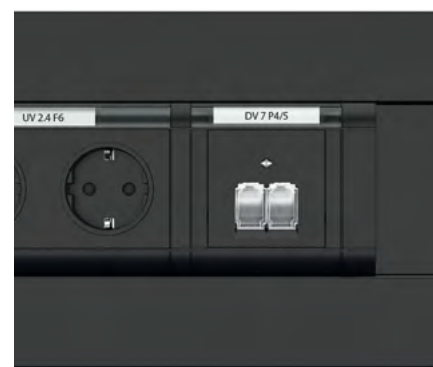

Especially renovation projects require a technically convincing, yet aesthetic cable management. This is exactly what SL offers, plus maximum flexibility.

Mini pole

Mini poles are not only highly compatible with the key technologies and needs of a modern working environment. They also complement many other Hager solutions in an elegant way.

BR trunking

Speaking of compatibility, the BR trunking system opens more channels for fast data. And if there's more need in the future, simply add more modules.

Erwin van Handenhoven, Design Director Hager Group

“We create a design framework within which the designer can move freely.”

The look of personalization.

A strong trend? Not following a trend. If this sounds like you, we highly recommend the Hager Manufaktur for one-of-a-kind solutions with individual colours, finishings and technical specifications tailored to your liking. Let's be unique.

Individual colours meet special lengths, shapes and formats. Hager offers almost unlimited possibilities when it comes to personalized solutions and even materials. Let's talk about your needs and wishes.

Time for more future.

Hager Forum

Let's get into an inspiring dialogue:
The Hager offers space for ideas,
exchange and more.

Visit: hagergroup.com/hagerforum

Buildings play a crucial role both in meeting environmental standards and within local strategies against global climate change. At Hager, our ideas become practical solutions.

“At Hager Group, sustainable development is far more than a theory, it’s a reality, measurable by the actions we take and the results we achieve.”

Denis Munch
Head of Sustainable Development

Certifications

With ISO14001 certification and PEP accordance we strongly support environmentally and socially responsible future projects.

More steps beyond

For example, **agardio** energy monitoring elevates energy efficiency to a new level: Offering an up-to-the-minute overview of detailed and total energy consumption of a building, agardio helps to unleash the great potential of energy saving in a practical way.

More services and partnerships for you.

Practical trainings, 3D-planning with BIM, fast and easy configurations and local, expert level helpdesks. We're ready to assist you.

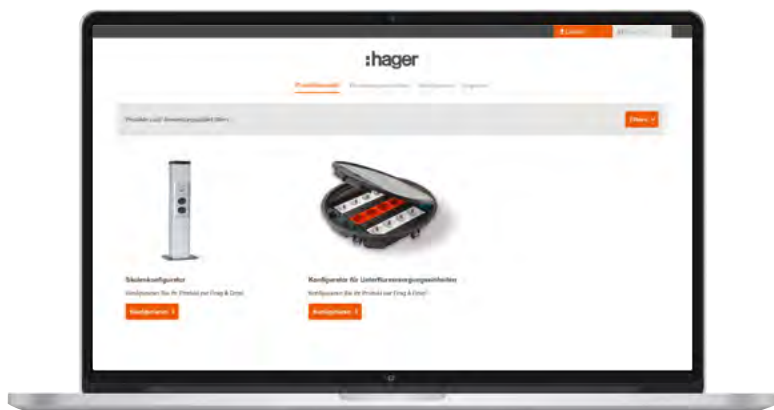

Training
